Successful Aging as a Contemporary Obsession Sarah Lamb, 2017-05-22 In recent decades the North American public has pursued an inspirational vision of successful aging striving through medical technique and individual effort to eradicate the declines vulnerabilities and dependencies previously commonly associated with old age On the face of it this bold new vision of successful healthy and active aging is highly appealing But it also rests on a deep cultural discomfort with aging and being old The contributors to *Successful Aging as a Contemporary Obsession* explore how the successful aging movement is playing out across five continents Their chapters investigate a variety of people including Catholic nuns in the United States Hindu ashram dwellers older American women seeking plastic surgery aging African American lesbians and gay men in the District of Columbia Chicago home health care workers and their aging clients Mexican men foregoing Viagra dementia and Alzheimer sufferers in the United States and Brazil and aging policies in Denmark Poland India China Japan and Uganda This book offers a fresh look at a major cultural and public health movement of our time questioning what has become for many a taken for granted goal aging in a way that almost denies aging itself

Planning Later Life Mark Schweda, Larissa Pfaller, Kai Brauer, Frank Adloff, Silke Schicktanz, 2017-07-06 This book examines the relevance of modern medicine and healthcare in shaping the lives of elderly persons and the practices and institutions of ageing societies Combining individual and social dimensions *Planning Later Life* discusses the ethical social and political consequences of increasing life expectancies and demographic change in the context of biomedicine and public health By focusing on the field of biomedicine and healthcare the authors engage readers in a dialogue on the ethical and social implications of recent trends in dementia research and care advance healthcare planning or the rise of anti ageing medicine and prevention Bringing together the largely separated debates of individualist bioethics on the one hand and public health ethics on the other the volume deliberately considers the entanglements of envisioning evaluating and controlling individual and societal futures So far the process of devising and exploring the various positive and negative visions and strategies related to later life has rarely been reflected systematically from a philosophical sociological and ethical point of view As such this book will be crucial to those working and studying in the life sciences the humanities and the social sciences particularly in the areas of bioethics social work gerontology and aging studies healthcare and social service sociology social policy and geography and population studies
