**Le Corbusier, peintre à Cap-Martin** Tim Benton, 2015-09-17 Né en Hongrie Emeric Feher 1904 1966 s'installe Paris en 1926 dans les mêmes années que Brassa André Kertész ou encore Man Ray Photographe indépendant dès 1936 ses reportages et commandes publicitaires documentent la France de son temps avec un regard humaniste Il mène en parallèle un travail personnel pour lequel il expérimente les possibilités des techniques photographiques En 1934 il crée avec le journaliste André Lejard la photographe allemande Maria Eisner et René Zuber la première agence photographique française dédiée à l'illustration pour la presse Alliance photo Comme chez tout humaniste ce qui compte pour Emeric Feher dans une image c'est de témoigner sur l'homme l'art n'est qu'un moyen de magnifier la vie Sous la direction de François Paviot ce catalogue rend hommage à la diversité et la richesse d'une œuvre encore moins connue Il accompagne l'exposition qui se tiendra au Logis royal du château du roi René Angers d'octobre 2015 janvier 2016 *Le Corbusier à Cap-Martin* Bruno Chiambretto, Le Corbusier, 1987

**The Painter Le Corbusier** Tim Benton, 2023-04-27 In 1929 Eileen Gray designed Villa E 1027 for herself and her youthful partner Jean Badovici but only lived there for three years Today the elegant house in Roquebrune Cap Martin in southern France is an icon of modernism In 1937 Le Corbusier discovered the place and the Maison en Bord de Mer Inspired by the genius of the place and the light on the Côte d'Azur he created a total of eight large format wall paintings there in 1938 and 1939 onwards some of which complement the building congenially while others set counterpoints In 1952 he built his Cabanon nearby and decorated it with murals as well The book by the well known architectural historian Tim Benton documents Le Corbusier's artwork at this special place explores its controversies and places it in his overall oeuvre The fascinating photographs by Manuel Bougot capture the special atmosphere of the villa Le Corbusier's painting is lesser known but was formative for his lifelong preoccupation with polychromy After extensive renovation work until 2021 E 1027 as well as the Cabanon is open to the public again **Being Modern** Robert Bud, Paul Greenhalgh, Frank James, Morag Shiach, 2018-10-10 In the early decades of the twentieth century engagement with science was commonly used as an emblem of modernity This phenomenon is now attracting increasing attention in different historical specialties Being Modern builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940 Addressing the breadth of cultural forms in Britain and the western world from the architecture of Le Corbusier to working class British science fiction Being Modern paints a rich picture Seventeen distinguished contributors from a range of fields including the cultural study of science and technology art and architecture English culture and literature examine the issues involved The book will be a valuable resource for students and a spur to scholars to further examination of culture as an interconnected web of which science is a critical part and to supersede such tired formulations as Science and culture *Contemporary Perspectives on Architectural Organicism* Gary Huafan He, Skender Luarasi, 2023-06-07 This project is born out of similar questions and discussions on the topic of organicism emergent from

two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism s infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally
