reporting continues to change rapidly to incorporate more detail and especially environmental and social information At the same time the mechanism for reporting has changed and the internet now enables more information to be provided to an ever wider range of stakeholders and interest groups The perceived conflict between financial performance representing the needs of investors and other dimensions of performance representing the needs of other stakeholders still however continues to exist In this updated edition this perceived conflict is re examined along with the wider purposes of corporate reporting These are examined in the context of web based reporting and a greater concern for all stakeholders The conclusion is that although recent developments have produced changes the essential conflict is still professed to exist but remains a largely imaginary one The analysis in this book makes use of both statistics and semiotics and in so doing develops a semiology of corporate reporting that offers an alternative to other research that is largely based on econometrics Researchers higher level students and others with an interest in or responsibility for corporate reporting corporate social responsibility accounting research or semiotics will find this book essential reading

[A History of Corporate Financial Reporting in Britain](#) John Richard Edwards, 2018-07-11 A History of Corporate Financial Reporting provides an understanding of the procedures and practices which constitute corporate financial reporting in Britain at different points of time and how and why those practices changed and became what they are now Its particular focus is the external financial reporting practices of joint stock companies This is worth knowing about given the widely held view that Britain i pioneered modern financial reporting and ii played a primary role in the development of both capital markets and professional accountancy The book makes use of a principal and agent framework to study accounting s past but one where the failure of managers always to supply the information that users desire is given full recognition It is shown that corporate financial reporting did not develop into its current state in a straightforward and orderly fashion Each era produces different environmental conditions and imposes new demands on accounting A proper understanding of accounting developments therefore requires a careful examination of the interrelationship between accountants and accounting techniques on the one hand and on the other the social and economic context within which changes took place The book s corporate coverage starts with the legendary East India Company created in 1600 and continues through the heyday of the statutory trading companies founded to build Britain s canals commencing in the 1770s and railways commencing c 1829 to focus principally on the limited liability company fashioned by the Joint Stock Companies Act 1844 and the Limited Liability Act 1855 The story terminates in 2005 when listed companies were required to prepare their consolidated accounts in accordance with International Financial Reporting Standards thus signalling the effective end of British accounting
