Peter Tregenza, Michael Wilson

Cibse Lighting Guide 2 2009:

The Colour, Light and Contrast Manual Keith Bright, Geoffrey Cook, 2010-01-06 Endorsed by the Society of Light and Lighting this practical book offers comprehensive guidance on how colour light and contrast can be incorporated within buildings to enhance their usability. The book provides state of the art clear guidance as well as a valuable information source for busy professionals involved in the design or management of new and existing environments. The ways colour light and contrast are used within built environments are critical in determining how people interact with the space and how confident safe and secure they will feel when doing so. They also have a major influence on a person's sense of well being and their ability to use the environment independently and without undue effort. Understanding how to use colour and contrast and how they are influenced by both natural and artificial lighting is vital for all those involved in the design and management of the environments and spaces we all use. In recent years there has been a considerable amount of work undertaken to further our understanding of how colour light and contrast affect emotion and sensory abilities and how they can assist or hinder people in their everyday lives. Other publications consider these issues individually but The Colour Light and Contrast Manual designing and managing inclusive built environments draws knowledge and information together to produce a unique comprehensive and informative guide to how the three elements can work together to improve the design and management of environments for us all. Building Services Design for Energy Efficient Buildings Paul Tymkow, Savvas Tassou, Maria Kolokotroni, Hussam Jouhara, 2020-07-12 The role and influence of building services engineers are undergoing rapid change and are pivotal to achieving low carbon buildings. However textbooks in the field have tended to remain fairly traditional with a detailed focus on the technicalities of heating ventilation and air conditioning. HVAC systems often with little wider context. This book addresses that need by embracing a contemporary understanding of the urgent challenge to address climate change together with practical approaches to energy efficiency and carbon mitigation for mechanical and electrical systems in a concise manner. The essential conceptual design issues for planning the principal building services systems that influence energy efficiency are examined in detail. These are HVAC and electrical systems. In addition the following issues are addressed: background issues on climate change, whole life performance and design collaboration, generic strategies for energy efficient low carbon design, health and wellbeing and post occupancy evaluation, building ventilation, air conditioning and HVAC system selection, thermal energy generation and distribution systems, low energy approaches for thermal control, electrical systems, data collection, controls and monitoring, building thermal load assessment, building electric power load assessment, space planning and design integration with other disciplines. In order to deliver buildings that help mitigate climate change impacts a new perspective is required for building services engineers from the initial conceptual design and throughout the design collaboration with other disciplines. This book provides a contemporary introduction and guide to this new approach for students and practitioners alike

Metric

Handbook David Littlefield,2012-09-10 An essential reference resource for any architect or architect student the Metric Handbook is the major handbook for planning and design data For each building type the book gives basic design requirements principal dimensional data and details of relevant building regulations The book also contains information on broader aspects of design applicable to all building types such as materials acoustics and lighting and data on human dimensions and space requirements Significantly updated the new edition of this work focuses on sustainable design practice to make projects competitive within a green market As well as a full revision including additional new building types and the latest updates to regulation and practice the book features an improved new layout with color images and text to make it easier to find vital information quickly Metric Handbook is a tried and tested authoritative reference for solving everyday planning problems it is a must have for every design office desk and drawing board **Metric Handbook** Pamela Buxton,2015-03-05 Significantly updated in reference to the latest construction standards and evolving building types Many chapters revised including housing transport offices libraries and hotels New chapter on flood aware design Sustainable design integrated into chapters throughout Over 100 000 copies sold to successive generations of architects and designers this book belongs in every design studio and architecture school library The Metric Handbook is the major handbook of planning and design information for architects and architecture students Covering basic design data for all the major building types it is the ideal starting point for any project For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of As well as building types the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook provides an invaluable resource for solving everyday design and planning problems Daylighting Peter Tregenza,Michael Wilson,2013-01-11 This authoritative and multi disciplinary book provides architects lighting specialists and anyone else working daylight into design with all the tools needed to incorporate this most fundamental element of architecture It includes an overview of current practice of daylighting in architecture and urban planning a review of recent research on daylighting and what this means to the practitioner a global vision of architectural lighting which is linked to the climates of the world and which integrates view sunlight diffuse skylight and electric lighting up to date tools for design in practice delivery of information in a variety of ways for interdisciplinary readers graphics mathematics text photographs and in depth illustrations a clear structure eleven chapters covering different aspects of lighting a set of worksheets giving step by step examples of calculations and design procedures for use in practice and a collection of algorithms and equations for reference by specialists and software designers This book should trigger creative thought It recognizes that good lighting design needs both knowledge and imagination Making Buildings Inclusive and Accessible 2009: Special Report ,

Circadian Lighting Design in the LED Era Maurizio Rossi,2019-02-06 This book explores how lighting systems based

on LED sources have the ability to positively influence the human circadian system with benefits for health and well being The opening chapters examine the functioning of the human circadian system its response to artificial lighting potential health impacts of different types of light exposure and current researches in circadian photometry A first case study analyzes the natural lighting available in an urban interior concluding that it is unable to activate the human circadian system over the entire year Important original research is then described in which systems suitable for artificial circadian lighting in residential interiors and offices were developed after testing of new design paradigms based on LED sources Readers will also find a detailed analysis of the LED products available or under development globally that may contribute to optimal artificial circadian lighting as well as the environmental sensors control interfaces and monitoring systems suitable for integration with new LED lighting systems Finally guidelines for circadian lighting design are proposed with identification of key requirements
