Clinical Research Methods in Speech-Language Pathology and Audiology, Fourth Edition David L. Irwin, Jeremy J. Donai, 2024-06-26. With a new chapter on evaluating research articles, the fourth edition of *Clinical Research Methods in Speech Language Pathology and Audiology* continues to be an essential resource for graduate students and clinicians seeking to understand the principles and methodologies involved with clinical research. As the demand for evidence-based practice continues to rise, understanding how to conduct and evaluate research becomes increasingly important in ensuring quality care and professional accountability. This text emphasizes how to effectively apply research to clinical practice and decision-making processes. Readers will also gain knowledge of the significance of research ethics and the ethical considerations involved. With the utilization of discussion materials, this text will facilitate learning and critical thinking among students as they engage with the material. This edition includes information on how to critically review both quantitative and qualitative articles. Current trends and updated examples from speech pathology and audiology literature will assist with real-world research situations. New to the Fourth Edition: New co-author Jeremy J. Donai, AuD, PhD, providing a fresh perspective; New chapter on critically evaluating quantitative and qualitative research articles; Examples regarding integration of citations into a literature review. **Key Features:** Chapters begin with an outline of covered topics and learning objectives; End-of-chapter discussion questions aid students in applying concepts; A comprehensive glossary allows students to easily find and define important terms; Numerous references throughout, including many ASHA and AAA Codes of Ethics.

MATLAB® Primer for Speech Language Pathology and Audiology Frank R. Boutsen, Justin D. Dvorak, 2015-11-30. MATLAB Primer for Speech Language Pathology and Audiology provides training and access to MATLAB, the computational language developed by MathWorks. While there are MATLAB textbooks and manuals written for the field of

engineering there are no textbooks targeting allied health disciplines particularly speech language pathology and audiology Research and practice in this field can greatly benefit from quantification and automation in data management a domain that is increasingly labor intensive The text anticipates and promotes increased reliance on quantification and automation in the fields of speech language pathology and audiology This book is intended for students practitioners and researchers in speech language pathology and audiology who wish to increase their productivity by incorporating and automating common research procedures and data analysis calculations or who wish to develop new tools and methods for their own paradigms and data processing It assumes no prior knowledge of programming but requires the reader to have a grasp of basic computer skills such as managing folders moving files and navigating file paths and folder structures Content and style are chosen so as to lower the threshold for an audience who has limited training in computer science Concepts are presented in a personalized writing style almost a dialogue with the reader along with a didactic format similar to programmed instruction using applications and work assignments that are concrete and manageable Key features include A comprehensive introduction for the user in an effort to limit background knowledge needed to understand the content Several mathematical review appendices Exercises for the student to apply skills learned in laboratory and clinical applications Disclaimer Please note that ancillary content such documents audio and video may not be included as published in the original print version of this book
