nursing students Technology has also begun to change the methods used in the actual bedside nursing care In this issue you will hear from some of the nursing experts in areas of nursing care that has changed in either the delivery of care or method of assessing care of the patient Nursing experts will describe some of the historical changes and intrigue you in the changes expected to come to the bedside Why is this issue important First we gain insight from a review of where we have been and nurses tend to reminisce on our past as well as romance our historical roots Second technology is ever changing and it is good practice to keep abreast of what is happening in other areas of nursing so that we can apply others successes in our own specific areas of nursing Third informatics in nursing is a growing field and nursing must embrace technology and learn to adapt various methods of delivery so that we can appropriately care for and advocate for our patients With the changes in our national healthcare system we must encourage nurses to try out new methods of delivery as well as encourage their ideas of how nursing can change The articles in this issue reflect these changes **Anesthesia for Cesarean Section**
