Suggested Considerations for Creating a Corporate Style Manual Melissa A. Gentile,1997 Visual communication is the key to maintaining any kind of corporate style Companies rely on a variety of visual aids to communicate their image to the public The desired image that each company has of themselves can be communicated to the public through a corporate signature a logotype symbols typefaces and corporate col ors All of these visual communicators help the public to identify the company its sub sidiaries its activities and its involvement with the public Companies often have so many visual aids that they have to be outlined in a corporate style manual A corporate style manual takes into consideration many areas and depending on the size of the company i e small medium and large these areas can be neatly mapped out and specified for reference In other words all of the areas of cor porate style a corporate signature a logotype symbols typefaces and corporate col ors are clearly illustrated and spelled out so to speak in the form of a manual that must be followed by all members of the company when representing their company graphically or otherwise Incorporated in this thesis project will not only be a more complete understanding of corporate style but instructions and illustrations on how to create a corporate style manual a chart showing the minimum requirements for small medium and large companies and a sample manual to be used as a reference for any company looking to create their own corporate style manual Abstract

The Business Style Handbook: An A-to-Z Guide for Writing on the Job with Tips from Communications Experts at the Fortune 500 Helen Cunningham,Brenda Greene,2002-02-12 In the everyday work world most professionals are on their own when it comes to writing reports memos proposals and other necessary correspondence The Business Style Handbook is a practical and comprehensive guide that focuses specifically on the writing issues that frequently arise on the job Insights and feedback from Fortune 500 communications executives provide tips and advice on improving writing style and effectiveness while more than 1 200 alphabetized entries cover the essentials of style and usage grammatical concepts and more School Reform, Corporate Style Dorothy Shipps,2006 Like other big city school systems Chicago s has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and

left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipp's reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipp's chronicles how Chicago's corporate actors led abetted or restrained nearly every attempt to transform the city's school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipp's concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipp's makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership
