Clothing Poverty The Hidden World Of Fast Fashion And Second Hand Clothes:

Clothing Poverty Andrew Brooks, 2015-02-12 An interesting and important account Daily Telegraph Have you ever stopped and wondered where your jeans came from Who made them and where Ever wondered where they end up after you donate them for recycling Following a pair of jeans Clothing Poverty takes the reader on a vivid around the world tour to reveal how clothes are manufactured and retailed bringing to light how fast fashion and clothing recycling are interconnected Andrew Brooks shows how recycled clothes are traded across continents uncovers how retailers and international charities are embroiled in commodity chains which perpetuate poverty and exposes the hidden trade networks which transect the globe Stitching together rich narratives from Mozambican markets Nigerian smugglers and Chinese factories to London s vintage clothing scene TOMS shoes and Vivienne Westwood s ethical fashion lines Brooks uncovers the many hidden sides of fashion

Fast Fashion Andrew Brooks, 2015-02-12 Fast Fashion A cut from Clothing Poverty marks the two year anniversary of the disastrous collapse of the Rana Plaza factory in Bangladesh on 24 April 2013 Featuring a new introduction along with a chapter from the previously published Clothing Poverty The hidden world of fast fashion and second hand clothes Andrew Brooks stitches together the events of the Rana Plaza tragedy with the hidden world of fast fashion providing a short but enlightening expos of the global commodity chains which perpetuate poverty

Remanufactured Fashion Pammi Sinha, Subramanian Senthilkannan Muthu, Geetha Dissanayake, 2016-01-14 This book highlights the concept and applications of Remanufactured Fashion The first book on this subject it covers reverse logistics exemplars and case studies of remanufactured fashion design Textile waste is a major issue for all countries and converting that waste into useful products offers a sensible solution Remanufactured Fashion is one such sustainable waste management strategy It involves the conversion of discarded garments into useful retail products without which they would be dumped at landfills posing a number of environmental issues Remanufacturing recovers a product s inherent value once that product no longer fulfills the user s desired needs The application and use of discarded clothing in remanufacturing processes could greatly reduce the percentage of clothing waste and mitigate related waste management issues while also contributing to resource conservation There has been scant research investigating what is actually involved in the fashion remanufacturing process and how the process could be up scaled to the mass market in order to achieve greater environmental gains This book addresses that gap in the literature and examines all aspects pertaining to the concept and applications of

Remanufactured Fashion

The Temporalities of Waste Fiona Allon, Ruth Barcan, Karma Eddison-Cogan, 2020-10-29 This book investigates the complex and unpredictable temporalities of waste Reflecting on waste in the context of sustainability materiality social practices subjectivity and environmental challenges the book covers a wide range of settings from the municipal garbage crisis in Beirut to food rescue campaigns in Hong Kong and the toxic by products of computer chip production in Silicon Valley Waste is one of the most pressing issues of the day central to environmental challenges and the

development of healthier and more sustainable futures The emergence of the new field of discard studies in addition to expanding research across other disciplines within the social sciences is testament to the centrality of waste as a crucial social material and cultural problem and to the need for multi and transdisciplinary approaches like those provided in this volume This edited collection seeks to develop a framework that understands the material properties of different kinds of waste not as fixed stable or singular but as dynamic relational and often invisible It brings together new and cutting edge research on the temporalities of waste by a diverse range of international authors Collectively this research presents a persuasive argument about the need to give more credence to the capacities of waste to provoke us in materially and temporally complex ways especially those substances that complicate our understandings of life as bounded duration This book will be of great interest to students and scholars of the environmental humanities cultural studies anthropology and human geography

Managing Fashion Kaled K. Hameide, 2020-11-19 The fashion industry is a multibillion dollar global industry with a variety of organizational structures and a multitude of challenges Such scope triggered the recent rise in management programs in the U S and Europe aiming to produce and train young managers to meet such global and diverse challenges Managing Fashion covers the fashion business with a twist a management twist Its goal is to tackle the topics from a fashion manager perspective referencing relevant management concepts and theories thus offering a deeper and more practical dimension to the issues addressed It offers a balanced mix of fashion and management theory and application as well as creating an opportunity for analysis and critical thinking Discussions throughout the book are supported by specially developed case studies and relevant examples taken from the fashion industry It is an opportunity to expose the fashion student or reader as well as aspiring fashion managers to a more practical approach to fashion theories and issues Managing Fashion will serve as a core text for Fashion Studies Fashion Entrepreneurship and Fashion Merchandising majors as well as for special business degrees and management certificates targeting the fashion industry

Front-Line Workers in the Global Service Economy Giovanna Fullin, 2021-06-17 Walking around the commercial streets of New York San Francisco Milan London or Paris and looking at the succession of multinational chain stores windows you can easily forget what country you are in However if you hear the small talk among the employees you hear very different stories In New York a 30 year old woman is worried because she does not know if she will work enough hours to make a living the following week whereas in Milan a mother of the same age knows she will work 20 hours a week but is concerned about whether her contract will be renewed at the end of the following month Following three years of fieldwork which included 100 in depth interviews with front line retail workers and unionists in New York City and Milan Front Line Workers in the Global Service Economy investigates both the lived experiences of salespersons in the fast fashion industry a retail sector made of large chains of stores selling fashion garments at low prices and the possibilities of collective action and structured forms of resistance to these global trends In the face of economic globalization and vigorous managerial efforts to minimize labor

costs and to standardize the retail experience mass fashion workers stories tell us how strong the pressure toward work devaluation in low skilled service sectors can be and how devastating its effects are on the workers themselves The Geographies of Fashion Louise Crewe, 2017-03-23 Clothes are inherently geographical objects yet few of us consider the social and economic significance of their journey from design to production to consumption The Geographies of Fashion is the first in depth study of fashion economies from a geographer s perspective exploring the complex relationship between our attachment to the clothes we own love and desire and their geographic and economic ties How far does a garment physically travel from factory to wardrobe How do clothes come to have social or economic value and who or what creates it What are the geographies of fashion and how do they interact with one another This ground breaking book powerfully reframes fashion spaces from the body to the city digital or virtual space to material production positioning fashion at the centre of contemporary culture and collective identities Combining contemporary theoretical approaches with a cutting edge analysis of international fashion brands and institutions including Maison Martin Margiela Zara Louis Vuitton ASOS and Savile Row The Geographies of Fashion is essential reading for students of fashion geography and related disciplines including sociology architecture and design

Plastic Legacies Trisia Farrelly , Sy Taffel , Ian Shaw , 2021-07-12 There is virtually nowhere on earth that remains untouched by plastics and the situation presents a serious threat to our natural world Despite the magnitude of the problem the interventions most often put in place are consumer led and market based and only nominally capable of addressing the issue As the problem worsens and neoliberal ideologies limit the world s responses to this crisis there is a growing need for legislative frameworks that attend to the complex social and ecological issues associated with plastics The contributors to this volume bring expertise from across academic disciplines to illustrate how plastics are produced consumed and discarded and to find holistic and integrated approaches that demonstrate an understanding of the wide ranging problem From the plasticization of earth s oceans to the endocrine disrupting chemicals that have the potential to seriously harm life as we know it these essays beg the question that we all must answer what is our plastic legacy With contributions by Imogen E Napper Sabine Pahl Richard C Thompson Sasha Adkins Stephanie B Borrelle Jennifer Provencher Tina Ngata Sven Bergmann Christina Gerhardt Elyse Stanes Tridibesh Dey Mike Michael Laura McLauchlan Johanne Tarpgaard Deirdre McKay Padmapani Perez Lei Xiaoyu and John Holland

Fashion and Class Rachel Worth, 2020-02-06 In what ways do changing notions of social class correspond with key developments in the history of fashion Focusing on examples ranging from 18th century Britain to aspects of the global fashion industry in the early 21st century Fashion and Class examines the meaning and evolution of the term class from its Marxist origins to modern day interpretations Did industrialisation technological change and developments in fashion retailing bring about a degree of class levelling or in fact intensify class antagonism And to what extent does modern mass consumption and cheap labour revive some of the ethical issues faced in 19th century British textile factories Exploring a variety of case studies that examine the

changing relationships between fashion and class in different historical contexts from the French revolutionaries of the 1780 90s through to the changing relationships between couture designer and high street fashion in the mid 20th century and onwards Fashion and Class is essential reading for those wishing to understand the ways in which the fashion system is closely connected with ideas of class
