Dimensions Of Teaching Business Ethics In Asia:

Dimensions of Teaching Business Ethics in Asia Stephan Rothlin, Parissa Haghirian, 2013-04-15 A growing number of higher education institutions in Asia are now integrating ethics courses in their curricula But the challenge remains to develop courses that can effectively reach their objectives and to create and use teaching materials appropriate to the particular profile of the students and executives in different regions and cultures In this context enhancing awareness for ethical dilemmas proposing frameworks and models to help managers handle difficult choices and demanding decisions while not being moralistic and imposing values and presenting alternative approaches through recent and relevant cases are the main objectives of this book It examines teaching methods learning tools and pedagogical methods effective in the teaching of ethics within the particular context of the rich diversity of Asian cultures and discusses ethics courses curricula aiming at developing the capacity to deal with a number of issues such as corruption intellectual property protection whistle blowing and consumer rights The relevance and limits of Asian philosophical and spiritual traditions and how their underlying values can be a meaningful aspect in the teaching of ethics to managers and business leaders are explored as are the benefits and limits of corporate codes of conduct and ways to enhance their effectiveness A similar approach is taken to the introduction of oaths and ethics pledges among business students which has been promoted in some business schools

The Political Economy of Business Ethics in East Asia Ingyu Oh, Gil Sung Park, 2016-09-28 The Political Economy of Business Ethics in East Asia A Historical and Comparative Perspective deals with modes of ethical persuasion in both public and private sectors of the national economy in East Asia from the periods of the fourteenth century to the modern era Authors in this volume ask how and why governments in pre modern Joseon Korea modern Korea and modern Japan used moral persuasion of different kinds in designing national economic institutions Case studies demonstrate that the concept of modes of exchange first developed by John Lie 1992 provides a more convincing explanation on the evolution of pre modern and modern economic institutions compared with Marx s modes of production as historically specific social relations or Smith s free market as a terminal stage of human economic development The pre modern and modern cases presented in this volume reveal that different modes of exchange have coexisted throughout human history Furthermore business ethics or corporate social responsibility is not a purely European economic ideology because manorial market entrepreneurial and mercantilist moral persuasions had widely been used by state rulers and policymakers in East Asia for their programs of advancing dissimilar modes of exchange In a similar vein the domination of the market and entrepreneurial modes in the twenty first century world is also complemented by other competing modes of change such as state welfarism public sector economies and protectionism Compares Chinese Japanese and Korean business ethics from a comparative and historical context Explores recent theoretical approaches to capitalist development in modern history in non Western regions Discusses the theoretical usefulness of new institutionalism modes of exchange and neoclassical discussions of business ethics Evaluates historical

Management in the New Economy Ora Setter,László Zsolnai,2019-04-23 This edited book frames a new ethos of management that cares for society future generations and nature whilst also serving the interests of business and the wider community Employing the practical wisdom of faith traditions the chapters develop the use of spirituality as a resource for creating business models that take pressing social problems such as quality of life at work over consumption environmental degradation and climate change into account Spanning entrepreneurship leadership management education and business models the chapters in this book aim to develop a spiritually based caring model of management to face the challenges and reality of the 21st century Faith and Work Timothy Ewest,2018-01-01 Those who adhere to a faith tradition are longing for theories and insights into how they can be true to their faith within the workplace and yet be sensitive and respectful to others of varying faith commitments and beliefs Yet for Christians respect of other faith traditions is especially difficult since

Christianity as the dominate religion has become secularized and institutionalized within the workplace as represented in holidays and days off Within the multiple theoretical and research dimensions of management religion and spirituality this book explores theoretical conceptual and strategic theories and research which consider how individuals and organizations integrate their Christian faith in the workplace and how these groups attempt to change society as a whole This historical movement is characterized by a desire for people to live a holistic life which integrates their Christian faith into the workplace also deemed faith at work Historically Christian s faith integration is manifested individually or collectively and is demonstrated in the ways it shapes and informs the values systems ethics character and attitudes towards work This edited volume draws themes out of the three historical epochs of the faith and work movement traced by Miller 2007 in the book God at work The history and promise of the faith at work movement These organizing themes while not congruent to the historical epochs do capture the ways in which people of faith have historically attempted to integrate their faith into the workplace These themes include Individual integration organizational strategies for integration and societal integration

Toward Assessing Business Ethics Education Diane L. Swanson, Dann G. Fisher, 2010-11-01 Toward Assessing Business Ethics Education edited by Diane L Swanson and Dann G Fisher of Kansas State University is a sequel to their book Advancing Business Ethics Education in the Ethics in Practice IAP book series The focus on assessment in this second book is a timely response to the urgent search among business schools for ways to teach and assess ethics at a time when the public s faith in corporations and business schools has been undermined greatly by the failure of both to respond to widespread corruption and scandals in the business sector Although no one expects business education alone to resolve these problems the distinguished scholars represented in this book

advocate that business schools should at least do their part by exposing their students to decision models that incorporate ethical dimensions on behalf of corporate stakeholders and society at large As the book s title conveys it is then important to assess key learning objectives to insure that business students graduate knowing ethics fundamentals and armed with the ability to recognize ethical dilemmas and possible solutions during the course of their careers This book will speak to all who are interested in accountability for business ethics education especially business school deans university administrators faculty members students and prospective employers This audience will find that the enterprise of assessing business ethics education is advanced in three ways First the book functions as a venue for distinguished scholars to share the innovative ways that they are assessing ethics coverage in courses and degree programs Second these authors identify what needs to be assessed and the means for doing so Third the book serves not only as a guide to assessment but also as a platform for expanding and improving ethics coverage in business schools Moreover an important take away for readers is the provision of a simple formula first advocated by Diane L Swanson and William C Frederick University of Pittsburgh in 2005 for delivering ethics education that minimizes assessment errors By following this formula business schools can provide assurances that ethics will not be assessed as being sufficient when it is woefully inadequate or even missing in the curriculum and that it cannot be distorted diluted or trivialized by uninformed coverage and still pass inspection Avoiding these assessment errors is critical in an educational environment in which weak accrediting standards for ethics go hand in hand with spotty uniformed coverage that would not be tolerated for other business disciplines

Prosocial Leadership Timothy Ewest, 2017-08-01 This book explores the behavioral phenomenon that is intended to aid in the benefit of others known as prosocial behavior The author combines eight years of quantitative and qualitative research to explain and delineate the antecedents to prosocial leadership and align these findings into an understandable model for prosocial leadership development This ground breaking text is the first to combine the elements of prosocial followership development and altruism as essential components to leadership It further explores the behaviors values and ideas leading to the formation of prosocial leadership within individuals and organizations
