Sudden Genius? Andrew Robinson,2010-09-16 The highly admired scientist Linus Pauling a double Nobel laureate in chemistry and peace was once asked by a student Dr Pauling how do you have so many good ideas Pauling thought for a moment and replied Well David I have a lot of ideas and throw away the bad ones Where do ideas come from Why do some people have many more of them than others How do you distinguish the good ideas from the bad Most intriguing of all perhaps why do the best ideas sometimes strike in a flash of sudden genius These questions are the subject of this book Andrew Robinson explores the exceptional creativity in both scientists and artists by following the trail that led ten individuals from childhood

to the achievement of a famous creative breakthrough as an adult in archaeology architecture art biology chemistry cinema music literature photography and physics Broken into three parts the book begins with the scientific study of creativity covering talent genius intelligence memory dreams the unconscious savant syndrome synaesthesia and mental illness The second part tells the stories of five breakthroughs by scientists and five by artists ranging from Curie s discovery of radium and Einstein s theory of special relativity to Mozart s composing of The Marriage of Figaro and Virginia Woolf s writing of Mrs Dalloway Robinson concludes by considering what highly creative people who achieve breakthroughs have in common whether breakthroughs in science and art follow patterns and whether they always involve imaginative leaps and even genius

Paul McCartney and His Creative Practice Phillip McIntyre, Paul Thompson, 2021-08-10 This book provides fresh insight into the creative practice developed by Paul McCartney over his extended career as a songwriter record producer and performing musician It frames its examination of McCartney s work through the lens of the systems model of creativity developed by Mihaly Csikszentmihalyi and combines this with the research work of Pierre Bourdieu This systems approach is built around the basic structures of idiosyncratic agents like McCartney himself and the choices he has made as a creative individual It also locates his work within social fields and cultural domains all crucial aspects of the creative system that McCartney continues to be immersed in Using this tripartite system the book includes analysis of McCartney s creative collaborations with musicians producers artists and filmmakers and provides a critical analysis of the Romantic myth which forms a central tenet of popular music This engaging work will have interdisciplinary appeal to students and scholars of the psychology of creativity popular music sociology and cultural studies

Genius Andrew Robinson, 2011-02-24 Homer Leonardo da Vinci Mozart Shakespeare and Tolstoy Curie Darwin Einstein Galileo and Newton What do these world famous artists and scientists have in common apart from the fact that their achievements predate our own time by a century or more Most of us would probably answer all ten possessed something we call genius which in each instance permanently changed the way that humanity perceived the world But pressed to be more precise we find it remarkably hard to define genius Genius is highly individual and unique of course yet it shares a compelling inevitable quality for professionals and the general public alike Darwin s ideas are still required reading for every working biologist they continue to generate fresh thinking and experiments around the world So do Einstein s theories among physicists Shakespeare s plays and Mozart s melodies and harmonies continue to move people in languages and cultures far removed from their native England and Austria Contemporary geniuses may come and go but the idea of genius will not let go of us Genius is the name we give to a quality of work that transcends fashion celebrity fame and reputation the opposite of a period piece Somehow genius abolishes both the time and the place of its origin This Very Short Introduction uses the life and work of familiar geniuses and some less familiar to illuminate both the individual and the general aspects of genius In particular the roles of talent heredity parenting education training hard work intelligence personality mental illness inspiration eureka moments and luck in the making of

genius ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Getting A Life: Strategies For Joyful & Effective Living Copthorne Macdonald,2013-12-17 Getting a Life is rooted in the idea that some steps toward wisdom require nothing more than a fresh look at common life situations nothing more than an appreciation of the difference between skilful and unskilful ways of dealing with those situations

Nature Exposed to Our Method of Questioning Amy Ione,2002 Nature Exposed to our Method of Questioning explores how we create our cultural assumptions about personhood culture and nature The following four questions frame the study 1 How do premodern modern and postmodern perspectives in art religion philosophy and science differ and interpenetrate 2 What does it mean to integrate questions ideas values and beliefs as we create our living environments 3 What are symbols and metaphors and how do they contribute to the human dialogue 4 How do purpose intention and consciousness foster creativity and influence our perceptions of human living Three conclusions emerged in exploring these questions 1 Models of earlier eras are not comprehensive enough to speak about the nature of our contemporary environment 2 Human models are creative human inventions 3 We benefit in defining open models rather than models which attempt to be universal in an all inclusive fashion

Creative Writing and the New Humanities Paul Dawson,2005 This polemic account provides a fresh perspective on the importance of Creative Writing to the emergence of the new humanities and makes a major contribution to current debates about the role of the writer as public intellectual
