Congress. House. Committee on the Judiciary. Subcommittee on Courts, Intellectual Property, and the Internet, 2013 The Economics of Copyright and the Internet: Moving to an Empirical Assessment Relevant in the Digital Era Sacha Wunsch-Vincent, World Intellectual Property Organization, 2013 Technology and the Internet have triggered important changes to how creative works are created and accessed and how creators and copyright based industries generate their revenues The authors reassess the economics of copyright in the light of these changes After providing an introduction to the economics of copyright they analyze the changes to the baseline copyright model triggered by the new technological landscape Then they assess the empirical economic work on copyright so far and suggest future avenues of research and related data needs *Handbook on the Economics of the Internet* Johannes M. Bauer, Michael Latzer, 2016-05-27 The Internet is connecting an increasing number of individuals organizations and devices into global networks of information flows It is accelerating the dynamics of innovation in the digital economy affecting the nature and intensity of competition and enabling private companies governments and the non profit sector to develop new business models In this new ecosystem many of the theoretical assumptions and historical observations upon which economics rests are altered and need critical reassessment Trade in Knowledge Antony Taubman, Jayashree Watal, 2022-03-17 Technological change has transformed the ways knowledge is developed and shared internationally Accordingly in the quarter century since the WTO was established and since its Agreement on Trade Related Aspects of Intellectual Property Rights came into force both the knowledge dimension of trade and the functioning of the IP system have been radically transformed The need to understand and respond to this change has placed knowledge at the centre of policy debates about economic and social development Recognizing the need for modern analytical tools to support policymakers and analysts this publication draws together contributions from a diverse range of scholars and analysts Together they offer a fresh understanding of what it means to trade in knowledge in today's technological and commercial environment The publication offers insights into the prospects for knowledge based development and ideas for updated systems of governance that promote the creation and sharing of the benefits of knowledge **Copyright** Neil Netanel, 2018 Copyright law was once an esoteric backwater the special province of professional authors publishers and media companies This is no longer the case In the age of social media and cloud storage we have become a copying and sharing culture Much of our everyday communication work and entertainment now directly involves copyright law Copyright law and policy are ferociously contested Record labels movie studios book publishers newspapers and many authors rage that those who share music video text and images over the Internet are stealing their property By contrast copyright industry critics celebrate digital

technology's potential to make the universe of movies music books and art accessible anytime and anywhere and to empower individuals the world over to express themselves by sharing and remixing those works These critics argue that excessive copyright enforcement threatens that promise and stifles creativity In *Copyright What Everyone Needs to Know* R Neil Netanel explains the concepts needed to understand the heated debates about copyright law and policy He identifies the combatants unpacks their arguments and illuminates what is at stake in the debates over copyright's present and future

What if we could reimagine copyright? Rebecca Giblin, Kimberlee Weatherall, 2017-01-09 What if we could start with a blank slate and write ourselves a brand new copyright system What if we could design a law from scratch unconstrained by existing treaty obligations business models and questions of political feasibility Would we opt for radical overhaul or would we keep our current fundamentals Which parts of the system would we jettison Which would we keep In short what might a copyright system designed to further the public interest in the current legal and sociological environment actually look like Taking this thought experiment as their starting point the leading international thinkers represented in this collection reconsider copyright's fundamental questions the subject matter that should be protected the ideal scope and duration of those rights and how it should be enforced Tackling the biggest challenges affecting the current law their essays provocatively explore how the law could better secure to creators the fruits of their labours ensure better outcomes for the world's more marginalised populations and solve orphan works And while the result is a collection of impossible ideas it also tells us much about what copyright could be and what prescriptive treaty obligations currently force us to give up The book shows that reimagined copyright could serve creators and the broader public far better than it currently does and exposes intriguing new directions for achievable reform
