CULTURE CRIT CONCEPTS VOL3 JENKS.,2004 Advances in Sociological Knowledge Nikolai Genov,2013-06-29 Das englischsprachige Buch zieht eine Bilanz der widersprüchlichen intellektuellen Entwicklung der Soziologie über ein halbes Jahrhundert. Die Disziplin braucht diese Aufarbeitung der eigenen Erfahrung, um mit den neuen sozialen und kognitiven Herausforderungen fertig zu werden.

Discipline and Learn Megan Watkins,2012-03-24 *Discipline and Learn* Bodies Pedagogy and Writing explores how discipline is typically construed as a form of subjection in contemporary educational thought and in critical and cultural theory more broadly. It provides a critique of this emphasis on the repressive aspects of discipline, highlighting its enabling potential and role in the development of dispositions to learning. The book engages with the work of a range of theorists: Foucault, Bourdieu, Merleau-Ponty, Mauss, and Spinoza, and considers their usefulness in theorizing embodiment and learning in the teaching of writing in the early years of school. Emphasis, however, is placed on the work of Bourdieu and his notion of habitus, melding theory and practice in an ethnography of contemporary classrooms. This text is invaluable reading for students and academics across the social sciences and humanities interested in questions of embodiment, affect, and their relation to learning. This is the most thought-provoking book to be published on pedagogy in a long time. Conceptually elegant and empirically rich, it undercuts conventional wisdom and potentially rearranges how we think about teaching, learning, and writing. It argues that students' bodies, not just their minds, matter in learning, explaining how, in practice, the desire to learn is a mindful, bodily disposition. And it shows how, through an enabling form of discipline, teachers can produce a scholarly habitus in all students, including the educationally disadvantaged and defiant. Jane Kenway, Professor of Education, Monash University. *Discipline and Learn* Bodies Pedagogy and Writing, an excellent book which makes an important contribution to our understanding of both pedagogy and the body, and which is sure to spark debate in both fields. It is careful and judicious in its approach but still manages to be provocative and original. Nick Crossley, Professor of Sociology, University of Manchester.

Surfing Life Mark Stranger,2017-03-02 *Surfing Life* is a study of surfing and social change that also provides insights into other experience-based contemporary subcultures and the nature of the self and social formations in contemporary society. Making use of extensive empirical material to support innovative theoretical approaches to social change, this book offers an analysis of the relationship between embodied experience, culture, and the economy. With its ground-breaking theoretical contributions and its foundation in an ethnographic study of surfing culture in locations across Australia, this volume will appeal not only to those interested in the social and cultural phenomenon of surfing but also to anyone interested in the sociology of sport and leisure, the sociology of culture, and consumption, risk-taking subcultures, and theories of contemporary social change.

This book brings together a group of international scholars to produce the first serious book length study of religious Satanism presenting a collection that will have wide appeal to specialists and non specialists alike The first part contains broader studies of influential groups and important aspects of the Satanic milieu especially regarding historical developments the construction of tradition and issues of legitimacy The second part narrows the view to regional variations especially with studies on Northern and Eastern Europe The third part consists of primary documents selected for their representational and informational value *Gaming Cultures and Place in Asia-Pacific* Larissa Hjorth, Dean Chan, 2009-06-24 This collection explores the politics of game play and its cultural context by focusing on the Asia Pacific region Drawing from micro ethnographic studies to macro political economy analysis of techno nationalisms and transcultural flows of cultural capital it provides an interdisciplinary model for thinking through the politics of gaming **Transnational Mobilities in Action Sport Cultures** H.
