Methods for Trustworthy Computer Systems (FM89) Karen Summerskill,Dan Craigen,2013-11-11 The 1989 Workshop on the Assessment of Formal Methods for Trustworthy Computer Systems FM89 was an invitational workshop that brought together representatives from the research commercial and governmental spheres of Canada the United Kingdom and the United States The workshop was held in Halifax Nova Scotia Canada from July 23 through July 27 1989 This document reports the activities observations recommendations and conclusions resulting from FM89 1 1 Purpose of Workshop The primary purpose for holding FM89 was to assess the role of formal methods in the development and fielding of trustworthy critical systems The need for this assessment was predicated upon four observations 1 Critical systems are increasingly being controlled by computer systems 2 Existing techniques for developing assuring and certifying computer based critical systems are inadequate 3 Formal methods have the potential for playing the same role in the development of computer based systems as applied mathematics does for other engineering disciplines and 4 Formal methods have had limited impact

on the development of computer based systems and supporting technologies The goal of the workshop was to complete the following tasks 1 Assess the problems retarding the development of trustworthy critical systems 2 Determine the potential impact of applying formal methods techniques to the development of trustworthy critical systems 3 Determine the research and development required to facilitate a broader application of formal methods techniques 4
