

Defending Symbolic Convergence Theory From an Imaginary Gunn

Ernest G. Bormann, John F. Cragan, and Donald C. Shields

In what follows, we defend symbolic convergence theory (SCT) from Joshua Gunn's recent criticisms.¹ Gunn calls for the creation of a new post-humanist, -Marxist, -Freudian approach to rhetorical criticism that would combine literary, critical, and psychoanalytic methods in a new "popular imaginary" paradigm.² While urging acceptance of his new paradigm, Gunn advances three major criticisms of SCT.³ To respond to them, it is important to lay out a general stance from which to defend SCT.⁴

Gunn's criticisms do not evolve out of any rhetorical or social scientific research on SCT that he conducted himself. Instead, his ideas flow from a critical theory stance developed by other post-modernist writers.⁵ Gunn does not refer to the main body of SCT research that would blunt his critique.⁶ Long ago Bormann established the theoretical basis for using SCT, a general theory, to critique a special communication theory. He reasoned that a general theory is grounded in social science research studies and is timeless, whereas special communication theories are time-bound, transitory rhetorical visions.⁷ Shields, for example, showed that the common ground between SCT and a special communication theory is that SCT explains the special theory as style specific and, thus, ephemeral. His critique of the critical autoethnography special theory demonstrates that Gunn's indictments of SCT (presented as contradictions or Gordian Knots) can simply be cut, à la Alexander the Great, because as a general theory, SCT explains any special communication theory as another rhetorical vision.⁸ Gunn espouses a nascent rhetorical vision in which post-modern rhetoricians will develop a paradigm called the popular imaginary, which is similar to Castoriadis's concept of the social imaginary as modified through Althusser's thinking on ideology and psychoanalysis, as a replacement.⁹ We choose not to participate in his vision; thus, we untie each knot.

Gordian Knot 1: SCT is Ontologically and Paradigmatically Inconsistent

SCT is alleged to be ontologically and paradigmatically inconsistent because it maintains a humanistic rhetor while advocating a de-centered, post-modern, co-construction of reality via publicly shared fantasies. Gunn views SCT as a bridge between modern and post-modern paradigms, as a forerunner of post-modern critical rhetorical theory that is in decline because it retains a modern ontology of humanism while espousing a post-modern, de-centered co-construction of symbolic reality. Gunn is mistaken on many levels. The first is that SCT is in decline with "diminished popularity" owing to "a number of internal contradictions" (50).

If by decline Gunn means popularity, he is mistaken. Scores of SCT-based articles have been published. Their appearance has been relatively constant over 30 years, and the number of fields using SCT is expanding. At this writing, the professional

Defending Symbolic Convergence Theory From An Imaginary Gunn:

Demonizing a President Martin A. Parlett, 2014-08-28 This groundbreaking political expos scrutinizes the motivations behind the unparalleled attacks on President Barack Obama that attempted to undermine his eligibility to lead the country. The ascendancy of the first Black president was a watershed moment in American history. In response, Obama's adversaries engaged in relentless and systematic mudslinging throughout his campaign and well into his presidency, othering him as a foreign and dangerous political figure. Never before has a presidential candidate been so maligned by so many in such a variety of ways and yet won. This provocative study investigates the unrest behind the Obama campaign and election and the controversial political machine that caused it. Martin A. Parlett himself, a former campaigner for Barack Obama, examines the role identity politics and racialization played in the anti-Obama movement, shows how foreignization is the latest tool for political dissent, and discusses the ways in which Obama successfully used the outsider label to his own advantage. The book questions the popular and often contradictory notions of Obama as illegitimate, Muslim, Marxist, Communist, socialist, Kenyan, terrorist, and angry African American. Additionally, chapters trace political marginalization and race throughout history from slavery to Reconstruction to the Civil Rights Movement, concluding with the culture of distrust in the American political psyche since the events of September 11, 2001.

The Social Construction of SARS John Henry Powers, Xiaosui Xiao, 2008 When the SARS virus began its spread from southern China around the world in spring 2003, it caught regional and international health officials by surprise. The SARS epidemic itself lasted for only a few months, whereas its treatment in communicative terms keeps providing us with important lessons that can prepare us all for the much larger pandemic that many are predicting will eventually occur. While the medical aspects of SARS are now relatively well understood, the discursive rhetorical dimensions are much less so. As an international epidemic, SARS arrived in a number of distinctive societies with the result that different communities handled the crisis in different ways, some far more effectively than others. Accordingly, the 12 chapters in *The Social Construction of SARS* are studies of how a major health-related crisis was understood and dealt with from a communicative perspective in such diverse places as Hong Kong, mainland China, Singapore, Taiwan, Canada, and the United States during the SARS outbreak.

Many business communication studies lack a strong theoretical grounding, a deficit that creates difficulties for researching business communication phenomena and building upon previous studies. The book addresses this issue by cataloging and briefly describing the major business communication theories, as well as giving a typology of these theories to better integrate them. This book provides value to business communication researchers who can use it to build upon and develop their work, experts in practice who can apply it to improve business communications, and academics who can use it to enhance their instructional designs.
