Chemistry Of The Textiles Industry Chemistry Of The Textiles Industry:

Chemistry of the Textiles Industry C. Carr, 2012-12-06 The manufacture and processing of textiles is a complex and essential industry requiring many diverse skills to ensure profitability New products are continually being developed and reflect the energy and innovation of those working in the field This book focuses on the technological aspects of the chemical processing of textiles and on the modifications necessary for specific work environments Coverage ranges from fibre structure and its relationship to tensile properties textile aesthetics comfort physiology and end use performance through to the effect of domestic processing by the consumer on the textile product The industry is constantly under environmental pressure and the book examines the nature of environmental control and the development of alternative technology to produce less environmental impact In order to provide a balanced view of the current situation authors have been drawn from academia research institutes and industry to produce a text that will be useful to both industrial readers and university students In conclusion I would like to thank the authors for their dedication and their contributions

The Chemistry of Textile Fibres, 2nd Edition Robert R. Maher, Roger H. Wardman, 2015-06-17 Textiles are ubiquitous materials that many of us take for granted in our everyday lives We rely on our clothes to protect us from the environment and use them to enhance our appearance Textiles also find applications in transport healthcare construction and many other industries The revised and updated 2nd Edition of The Chemistry of Textile Fibres highlights the trend towards the synthesis from renewable resources of monomers for making synthetic fibres It contains new information on the influence of legislation and the concerns of environmental organisations on the use of chemicals in the textile industry New sections on genetically modified cotton anti microbial materials and spider silk have been added as well as a new chapter covering functional fibres and fabrics This book provides a comprehensive overview of the various types of textile fibres that are available today ranging from natural fibres to the high performance fibres that are very technologically advanced Readers will gain an appreciation of why particular types of fibre are used for certain applications through understanding the chemistry behind their properties Students following A level courses or equivalent and first year undergraduate students reading textile technology subjects at university will find this book a valuable source of information

Green Chemistry for Sustainable Textiles Nabil Ibrahim, Chaudhery Mustansar Hussain, 2021-07-21 Green Chemistry for Sustainable Textiles Modern Design and Approaches provides a comprehensive survey of the latest methods in green chemistry for the reduction of the textile industry's environmental impact In recent years industrial R D has been exploring more sustainable chemicals as well as eco friendly technologies in the textile wet processing chain leading to a range of new techniques for sustainable textile manufacture This book discusses and explores basic principles of green chemistry and their implementation along with other aspects of cleaner production strategies as well as new and emerging textile technologies providing a comprehensive reference for readers at all levels Potential benefits to industry from the techniques covered in this book include Savings in water energy and

chemical consumption waste minimization as well as disposal cost reduction and production of high added value sustainable textile products to satisfy consumer demands for comfort safety aesthetic and multi functional performance properties Innovative emerging methods are covered as well as popular current technologies creating a comprehensive reference that facilitates comparisons between methods Evaluates the fundamental green chemistry principles as drivers for textile sustainability Explains how and why to use renewable green chemicals in the textile wet processing chain *Textile Chemistry* Thomas Bechtold,Tung Pham,2023-04-03 Textile and fibre chemistry form the theoretical basis to understand production and properties of textile based products In this 2nd edition fundamentals of textile chemistry and theoretical and applicatory aspects of colour chemistry are interconnected to draw detailed picture of chemical reactions occurring during production and modification of textile products An overview about chemical modification finishing operations is given to explain how to impart special functionalities into functional products Examples for technical scale processes and representative machinery used therein give insight into the technical reality of a dyehouse A new chapter about circularity of textiles highlights the interlinkage between product design including dyes and finishes and the requirements to develop future fibre to fibre recycling The work covers all relevant aspects of a textile product from fibre production coloration finishing consumer use and fibre to fibre recycling The content of the book allows a first entry into this multi disciplinary field Through its comprehensive character the authors explain the interdependence between textile and fibre processing and aspects of recycling which makes the work a valuable source of information to design future textiles for circularity
