Cape Management Of Business Syllabus 2014:

Management Accounting Professor Carsten Berkau, 2020-04-20 Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands, and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two points of view: 1. a General Management view with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross border acquisitions, and risk valuation; 2. a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting, job order and process costing, activity based costing, and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English. Managing Crises in Tourism Acolla Lewis-Cameron, Leslie-Ann Jordan, Sherma Roberts, 2021-10-19 This book examines the dilemma of overdependence on tourism in Caribbean countries and territories and the need for a resilient path to address the industry's vulnerability in the face of natural disasters. The chapters in the book question how tourism resilience is understood and practiced in Caribbean small island developing states (SIDS) and the factors that inform, undermine, or indeed redefine the sustainable resilience agenda for these territories. With its overreliance on tourism and vulnerability to climate, the Caribbean region finds itself susceptible and in need of an innovative approach in order to survive economically. Contributors to this volume touch on all three sustainability pillars and spanning across many tourism sector considerations such as product development, stakeholder management, hotel management, marketing, and entrepreneurship. By spanning the geography of the Anglophone and Spanish Caribbean, this book offers a smorgasbord of conceptual and applied perspectives to researchers in the area of tourism resilience in SIDS. It also presents strategic considerations to public and private sector practitioners in implementing measures to strengthen the competitive positioning of their destinations as they contend with the dynamism of the external and internal environments.
