The Multicultural Classroom: Learning from Australian First Nations Perspectives Jasmin Peskoller, 2021-10-19 The scope of multilingualism and multiculturalism within societies is increasing on a global scale As this is happening discussions are emerging concerning the significance of including a variety of perspectives in classroom discourse as well as the imperative of ridding it of a prevailing monocultural straitjacket Against the backdrop of these changing realities authors have advocated for a revision and adaptation of current teaching methodology and classroom materials in order to do greater justice to an increasingly diverse student population This book presents the findings from a qualitative research project conducted in Australia a country acclaimed for its linguistic and cultural diversity Specifically the study investigated the educational context of Indigenous Australian learners by shedding light on the incorporation of First Nations perspectives in teaching materials and methodology Additionally the project identified therewith related challenges and possibilities for improvement The results provide insights into the

multifacetedness of language as well as culture related factors which prove vital for learning processes Moreover the results reveal the complexities arising in connection with the incorporation of First Nations perspectives in classroom discourse The data also point towards dimensions for improvement and recommendations for action for educators working in diverse classroom settings As growing linguistic and cultural diversity has become a global reality this volume addressing Australian First Nations perspectives offers an important contribution to the field of contemporary education **Evolving**

Obiakor, Ying Hui-Michael, 2018-10-01 *Voices of Asian Americans in Higher Education* Unheard Voices is a unique and historical book Asian Americans are often portrayed as model minority yet their personal and educational experiences are often unheard In this book 10 Asian American educators and scholars present realistic pictures of America's higher education using personal narratives The contributors in this book come from different regions and teach in different colleges and universities and coincidentally they all endure the outsider category formerly as students and now as professors and leaders This outsider status can be emotionally overwhelming and psychologically unnerving This status hampers opportunities for Asian Americans to grow and maximize their fullest potential Though they develop different strategies to address their outsider label it does not make it comfortable But time and time again they have proven that they can succeed In this technological age we must value unending truths as we educate ourselves and others We hope that this book will be an educational and informational resource for students administrators and faculty in higher education and also educational policy makers and stakeholders
