Cultivating An Ecological Conscience Essays From A Farmer Philosopher:

Cultivating an Ecological Conscience Frederick L. Kirschenmann, 2010-04-14 A superb collection of essays one of the wisest sanest most practical and most trusted voices in the movement to reform the American food system Michael Pollan 1 New York Times bestselling author of *This is Your Mind on Plants* Theologian academic and third generation organic farmer Frederick L Kirschenmann is a celebrated agricultural thinker who has tirelessly promoted the principles of sustainability for three decades *Cultivating an Ecological Conscience* documents Kirschenmann's evolution and his lifelong contributions to the new agrarianism in a collection of his greatest writings on farming philosophy and sustainability Working closely with agricultural economist and editor Constance L Falk Kirschenmann recounts his intellectual and spiritual journey In a unique blend of personal history philosophical discourse spiritual ruminations and practical advice Kirschenmann interweaves his insights with discussion of contemporary agrarian topics This collection serves as an invaluable resource to agrarian scholars and introduces readers to an agricultural pioneer whose work has profoundly influenced modern thinking about food We re past the moment when agriculture was something we could forget about in a warming world there's no more crucial topic and here's the short course in how to think about it Bill McKibben author of *Falter* *International Law and Agroecological Husbandry* John W. Head, 2016-11-25 Remarkable advances are being made in life science and agricultural research to reform the methods of food production particularly with regard to staple grain and legume crops in ways that will better reflect ecological realities However advances in science may be insufficient to ensure that these possibilities for agricultural reform are realized in practice and in a sustainable way This book shows how these can only be achieved through changes in legal norms and institutions at the global level Interdisciplinary in character the book draws from a range of issues involving agricultural innovation international legal history and principles treaty commitments global institutions and environmental challenges such as climate change to propose broad legal changes for transforming global agriculture It first shows how modern extractive agriculture is unsustainable on economic environmental and social grounds It then examines the potential for natural systems agriculture especially perennial polyculture systems for overcoming the deficiencies of modern extractive agriculture especially to offset climate change Finally it analyses closely the legal innovations that can be adopted at national and international levels to facilitate a transition from modern extractive agriculture to a system based more on ecological principles In particular the author argues for the creation of a Global Convention on Agroecology **Rebuilding the Foodshed** Philip Ackerman-Leist, 2013-01-24 In *Rebuilding the Foodshed* Philip Ackerman Leist provides a roadmap to re localize our food systems How by rebuilding our foodsheds to keep more of our dollars in the local economy meet food needs affordably and sustainably and make our food systems more just and resilient This book showcases some of the most promising replicable models that are trying to tackle tough issues like distribution and transportation energy costs fair labor rampant food waste and institutional food needs By answering these questions and more *Rebuilding the Foodshed* leads us to

the next phase of the local food revolution COVER *A Global Corporate Trust for Agroecological Integrity* John W. Head, 2019-06-14 This book examines global environmental governance and how legal institutional and conceptual reform can facilitate a transformation to a new natural systems form of agriculture. Profound global climate disruption makes it essential that we replace our current agricultural system described in this book as a fossil carbon dependent modern extractive agriculture with a natural systems agriculture featuring perennial grains growing in polycultures thereby mimicking the natural grassland and forest ecosystems that modern extractive agriculture has largely destroyed. After examining relevant international legal and conceptual foundations sovereignty federalism global governance and existing international organizations focusing on agriculture the book explores legal and institutional opportunities to facilitate dramatic agricultural reform and ecological restoration. Among other things it explains how innovative federalism structures around the world provide patterns for reorienting global environmental governance including what the book calls eco states that would through exercise of pluralistic sovereignty be responsible for agroecological management. Drawing from his experience working in international institutions the author provides detailed global governance proposals for facilitating the type of agricultural reform that can help avoid ecological collapse especially through soil degradation and climate change. This book will be of great interest to students and scholars of international law agroecology climate change ecological restoration sustainable development and global governance as well as policy makers and practitioners working in these fields.

Resilient Agriculture Laura Lengnick, 2015-05-11 Climate change presents an unprecedented challenge to the productivity and profitability of agriculture in North America. More variable weather drought and flooding create the most obvious damage but hot summer nights warmer winters longer growing seasons and other environmental changes have more subtle but far reaching effects on plant and livestock growth and development. *Resilient Agriculture* recognizes the critical role that sustainable agriculture will play in the coming decades and beyond. The latest science on climate risk resilience and climate change adaptation is blended with the personal experience of farmers and ranchers to explore the strange changes in weather recorded over the last decade. The associated shifts in crop and livestock behavior. The actions producers have taken to maintain productivity in a changing climate. The climate change challenge is real and it is here now. To enjoy the sustained production of food fiber and fuel well into the twenty first century we must begin now to make changes that will enhance the adaptive capacity and resilience of North American agriculture. The rich knowledge base presented in *Resilient Agriculture* is poised to serve as the cornerstone of an evolving climate ready food system. Laura Lengnick is a researcher policymaker activist educator and farmer whose work explores the community enhancing potential of agriculture and food systems. She directs the academic program in sustainable agriculture at Warren Wilson College and was a lead author of the report *Climate Change and Agriculture in the United States: Effects and Adaptation*. **The Rural Midwest Since World War II** J. L. Anderson, 2014-02-01 J. L. Anderson seeks to change the belief that the Midwest lacks the kind of geographic

coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own

An Agrarian Proposal Rebecca Judge, Charles Taliaferro, 2022-12-02 An Agrarian Proposal examines how the communitarian perspectives shared among colonial New England s settlers and the farming methods they employed can be adapted to cultivate contemporary agricultural practices policies and ethical commitments Together these promote sustainable farming and land stewardship even as they valorize farming as a vital locus for cultivating virtue In contrast to the celebration of libertarian ideals and the general distrust of government regulation characterizing the writings of many prominent modern agrarian writers who follow the tradition of Jefferson and the Southern agrarians An Agrarian Proposal explores how faith based commitments shared among colonial New England s settlers resulted in resource distribution and stewardship practices that created a sustainable approach to land and resource management An Agrarian Proposal adds to contemporary considerations of the ethics and practices of agrarianism by exploring a time and place where regulation was deemed a necessary means of fostering good land stewardship and where a faith based communitarianism challenged individualism to promote sustainable land practices by individuals farming New England s rocky and isolated fields

Ecoagriculture for a Sustainable Food Future Nicole Y. Chalmer, 2021-05-03 Global food security is dependent on ecologically viable production systems but current agricultural practices are often at odds with environmental sustainability Resolving this disparity is a huge task but there is much that can be learned from traditional food production systems that persisted for thousands of years Ecoagriculture for a Sustainable Food Future describes the ecological history of food production systems in Australia showing how Aboriginal food systems collapsed when European farming methods were imposed on bushlands The industrialised agricultural systems that are now prevalent across the world require constant input of finite resources and continue to cause destructive

environmental change This book explores the damage that has arisen from farming systems unsuited to their environment and presents compelling evidence that producing food is an ecological process that needs to be rethought in order to ensure resilient food production into the future Cultural sensitivity Readers are warned that there may be words descriptions and terms used in this book that are culturally sensitive and which might not normally be used in certain public or community contexts While this information may not reflect current understanding it is provided by the author in a historical context
