important historical narratives and the region's languages, religions, and global connections. Students are guided through the material with relevant maps, resource boxes, and text boxes that support and guide further independent exploration of the topics at hand. The second half of the book presents interdisciplinary case studies, each of which focuses on a specific country or sub-region and a salient issue, offering a taste of the cultural distinctiveness of the particular country while also drawing attention to global linkages. Readers will come away from this book with an understanding of the larger historical, political, and cultural frameworks that shaped the Middle East as we know it today and of current issues that have relevance in the Middle East and beyond.

What the Rest Think of the West Laura Nader, 2015-09-08 Over the past few centuries, as Western civilization has enjoyed an expansive and flexible geographic domain, Westerners have observed other cultures with little interest in a return gaze. In turn, these other civilizations have been similarly disinclined when they have held sway. Clearly, though, an external frame of reference outstrips introspection; we cannot see ourselves as others see us. Unprecedented in its scope, *What the Rest Think of the West* provides a rich historical look through the eyes of outsiders as they survey and scrutinize the politics, science, technology, religion, family practices, and gender roles of civilizations, not their own. The book emphasizes the broader figurative meaning of looking west in the scope of history. Focusing on four civilizations—Islamic, Japanese, Chinese, and South Asian—Nader has collected observations made over centuries by scholars, diplomats, missionaries, travelers, merchants, and students reflecting upon their own Wests. These writings derive from a range of purposes and perspectives, such as the seventh-century Chinese Buddhist who goes west to India, the missionary from Baghdad who travels up the Volga in the tenth century and meets the Vikings, and the Egyptian imam who in 1826 is sent to Paris to study the French. The accounts variously express critique, adoration, admiration, and fear, and are sometimes humorous, occasionally disturbing, at times controversial, and always enlightening. With informative introductions to each of the selections, Laura Nader initiates conversations about the power of representational practices.

Global Governance and Muslim Organizations Leslie A. Pal, M. Evren Tok, 2018-07-31 There are 1.6 billion Muslims in the world, represented on the world stage by 57 states as well as a host of international organizations and associations. This book critically examines the engagement of these states in systems of global governance and with a variety of policy regimes, including climate change, energy, migration, humanitarian aid, international financial institutions, research, and education. Chapters explore the dynamics of this engagement, the contributions to global order, the interests pursued, and some of the contradictions and tensions within the Islamic world and between that world and the West. An in-depth perspective is provided about the traditional and new forms of multilateralism and the policy spaces formed, which provide new opportunities for the Muslim and non-Muslim world alike.

Jesus of Arabia Andrew Thompson, 2018-01-26 In *Jesus of Arabia*, the Reverend Canon Andrew Thompson introduces an unfamiliar Jesus, Jesus in the context of his home in the Middle East. Whether readers believe Jesus to be a prophet or the messiah, Thompson enhances our understanding of his work and character by looking at his social context as a man and

Middle Easterner Jesus's teachings take on new meaning as Thompson explores themes including family in Arabia gender roles in the region food culture and more Jesus of Arabia looks at the bridges between Islam and Christianity through the figure of Jesus and how the two communities may reflect each other despite their differences Thompson draws on his experience as a priest in the Anglican Church and his many years living in the Middle East to analyze the often conflicting roles and loyalties concerning family culture and God A timely and incisive work Jesus of Arabia invites us to consider contemporary views of the Middle East and how a figure like Jesus might be received today

The Human Rights Turn and the Paradox of Progress in the Middle East Mishana Hosseinioun, 2017-10-11 This book aims to shift the limited and often negative popular understanding of the Middle East's place in the world by chronicling the region's contributions to the international order rather than disorder and to the development of the international human rights system It elucidates the many paradoxes that make the Middle East and North Africa MENA region both a troubling place and also a region brimming with great potential for peace prosperity and progress By demonstrating the paradox of human rights progress amid regress the book tells a radically new and more hopeful side of the story of the region that has largely been obfuscated and omitted from the chronicles of history In so doing it shows that fostering a human rights culture is not only possible for all universally it is inevitable
