Mainstreaming Solar Energy in Small, Tropical Islands Kiron C. Neale, 2020-03-05 This book explores how cultural considerations can improve policymaking to achieve mainstream solar energy in small tropical islands Focusing on Trinidad Barbados and Oahu Kiron C Neale looks at how culture can affect and be affected by the policies that support the household adoption of two key energy technologies solar water heating and photovoltaics Drawing on interviews with residents and energy officials and an examination of the institutional socio economic and physical factors that affect energy systems such as governance structures and energy resource availability the author explores themes including the impact of insularity on energy transitions and behavioural and cultural change Overall this book rebrands policies as instruments of cultural change and puts forward recommendations applicable to all small tropical islands Following the islands transition to renewable energy this book will be of great interest to scholars of energy policy energy transitions climate change cultural studies and small states development as well as industry professionals working on energy policy implementation

Energy Impacts Jeffrey B. Jacquet, Julia H. Haggerty, Gene L. Theodori, 2021-01-01 Development of

various energy sources continues across North America and around the world raising questions about social and economic consequences for the places and communities where these activities occur Energy Impacts brings together important new research on site level social economic and behavioral impacts from large scale energy development Featuring conceptual and empirical multidisciplinary research from leading social scientists the volume collects a broad range of perspectives to understand North America s current energy uses and future energy needs Twelve chapters from respected scholars in a variety of disciplines present new ways to consider and analyze energy impact research Focused on varied energy topics geographies and disciplines each chapter includes a policy brief that summarizes the work and provides key takeaways to apply the findings to policy and public discourse Meaningful public engagement is critical in limiting the negative implications of energy development and understanding the social influences on and of energy systems is a cornerstone of addressing the climate crisis As such Energy Impacts is a significant work for students scholars and professionals working in sociology education geography environmental studies and public health This material is based upon work supported by the National Science Foundation under Grant No 1528422 Publication is also supported in part by Montana State University Contributors Ali Adil Lisa Bailey Davis Nancy Bowen Elizewy Morey Burnham Weston Eaton Heather Feldhaus Felix Fernando Emily Grubert C Clare Hinrichs John Hintz Richard Hirsh Season Hoard Tamara Laninga Eric Larson Achla Marathe Natalie Martinkus Seven Mattes Ronald Meyers Patrick Miller Ethan Minier Myra Moss Jacob Mowery Thomas Murphy Sevda Ozturk Sari John Parkins Christopher Podeschi Nathan Ratledge Sanne Rijkhoff Kelli Roemer Todd Schenk Anju Seth Kate Sherren Jisoo Sim Marc Stern Jessica Ulrich Schad Cameron Whitley Laura Zachary

Everyday Energy Politics in Central Asia and the Caucasus David Gullette, Jeanne Féaux de la Croix, 2017-10-02 The perception of Central Asia and its place in the world has come to be shaped by its large oil and gas reserves Literature on energy in the region has thus largely focused on related geopolitical issues and national policies However little is known about citizens needs within this broader context of commodities that connect the energy networks of China Russia and the West This multidisciplinary special issue brings together anthropologists economists geographers and political scientists to examine the role of all forms of energy here oil gas hydropower and solar power and their products especially electricity in people s daily lives throughout Central Asia and the Caucasus The papers in this issue ask how energy is understood as an everyday resource as a necessity and a source of opportunity a challenge or even as an indicator of exclusionary practices We enquire into the role and views of energy sector workers rural consumers and urban communities and their experiences of energy companies and national policies We further examine the legacy of Soviet and more recent domestic energy policies the environmental impact of energy use as well as the political impact of citizens energy grievances This book was published as a special issue of Central Asian Survey *Energy and Environmental Justice* Tristan Partridge, 2022-10-20 This book reconnects energy research with the radical reflexive and transformative approaches of Environmental Justice Global patterns of energy production and use are disrupting the

ecosystems that sustain all life disproportionately affecting marginalized groups Addressing such injustices this book examines how energy relates to structural issues of exploitation racism colonialism extractivism the commodification of work and the systemic devaluing of diverse others The result is a new agenda for critical energy research that builds on a growing global movement of environmental justice activism and scholarship Throughout the book the author reframes transitions as collaborative projects of justice that demand structural change and societal shifts to more equitable and reciprocal ways of living This book will be an invaluable resource for students scholars and practitioners interested in transforming energy systems and working collectively to build just planetary futures *The Birth of Energy* Cara New Daggett,2019-09-13 Cara New Daggett traces the genealogy of the idea of energy from the Industrial Revolution to the present showing how it has informed fossil fuel imperialism the governance of work and our relationship to the Earth Energy Transitions Olivier Labussière,Alain Nadaï,2018-04-30 This book elucidates what it means to transition to alternative sources of energy and discusses the potential for this energy transition to be a more democratic process The book dynamically describes a recent sociotechnical study of a number of energy transitions occurring in several countries France Germany and Tunisia and involving different energy technologies including solar on off shore wind smart grids biomass low energy buildings and carbon capture and storage Drawing on a pragmatist tradition of social inquiry the authors examine the consequences of energy transition processes for the actors and entities that are affected by them as well as the spaces for political participation they offer This critical inquiry is organised according to foundational categories that have defined the energy transition renewable energy resources markets economic instruments technological demonstration spatiality scale and temporality horizon s Using a set of select case studies this book systematically investigates the role these categories play in the current developments in energy transitions *Off the Grid* Phillip Vannini,Jonathan Taggart,2014-10-30 Off grid isn t a state of mind It isn t about someone being out of touch about a place that is hard to get to or about a weekend spent offline Off grid is the property of a building generally a home but sometimes even a whole town that is disconnected from the electricity and the natural gas grid To live off grid therefore means having to radically re invent domestic life as we know it and this is what this book is about individuals and families who have chosen to live in that dramatically innovative but also quite old way of life This ethnography explores the day to day lives of people in each of Canada s provinces and territories living off the grid Vannini and Taggart demonstrate how a variety of people all with different environmental constraints live away from contemporary civilization The authors also raise important questions about our social future and whether off grid living creates an environmentally and culturally sustainable lifestyle practice These homes are experimental labs for our collective future an intimate look into unusual contemporary domestic lives and a call to the rest of us leading ordinary lives to examine what we take for granted This book is ideal for courses on the environment and sustainability as well as introduction to sociology and introduction to cultural anthropology courses **Infrastructure, Environment, and Life in**

the Anthropocene Gregg Hetherington, 2018-12-31 Infrastructure Environment and Life in the Anthropocene explores life in the age of climate change through a series of infrastructural puzzles sites at which it has become impossible to disentangle the natural from the built environment With topics ranging from breakwaters built of oysters underground rivers made by leaky pipes and architecture gone weedy to neighborhoods partially submerged by rising tides the contributors explore situations that destabilize the concepts we once relied on to address environmental challenges They take up the challenge that the Anthropocene poses both to life on the planet and to our social scientific understanding of it by showing how past conceptions of environment and progress have become unmoored and what this means for how we imagine the future Contributors Nikhil Anand Andrea Ballesterio Bruce Braun Ashley Carse Gast n R Gordillo Gregg Hetherington Casper Bruun Jensen Joseph Masco Shaylih Muehlmann Natasha Myers Stephanie Wakefield Austin Zeiderman
