Description

This Cummins® Onan® GG-series spark ignited generator set is a fully integrated power generation system, providing optimum performance, reliability, and versatility for standby and prime power operation, in stationary or mobile applications.

A primary feature of the GG GenSet is strong motor starting capability and fast recovery from transient load changes. The GG torque matched system includes a heavy duty Cummins 4-cycle spark ignited engine, an AC alternator with high starting kVA capacity at a low power factor, and an electronic voltage regulator for precise regulation under steady-state or transient loads. The GG GenSet accepts 100% of the nameplate standby rating in one step, in compliance with NFPA 110 requirements.

A LP vapor fuel system is standard with several options for natural gas and LP liquid as well as dual fuel.

The GG GenSet offers both user and environment friendly operation. The standard PowerCommand® GenSet control is a microprocessor-based system with local or automatic remote starting/stopping, Smart Starting, integrated governor and voltage regulation, alarm and status message display, AmpSentry protection, output metering, and auto-shutdown at fault detection, all to provide highly reliable GenSet performance.

Factory testing of each production unit is at rated load and power factor. This testing includes demonstration of rated power and single-step rated load pickup. Cummins Onan manufacturing facilities are registered to ISO9001 quality standards, emphasizing our commitment to high quality in the design, manufacture, and support of our products. GG generator sets are CSA certified, and the PowerCommand control is UL508 listed.

All Cummins Onan brand power generation systems are backed by a comprehensive warranty program and supported by a worldwide network of 170 distributors and service branches, to assist you with warranty, service, parts, and planned maintenance support.
