

PT Fuel Pump

The selection of engine parts is critical to engine performance. This manual will simplify this selection.

Control Parts List

Description

This CPL (Control Parts List) Manual is a listing of basic engine parts and timing specifications which are necessary to produce a given engine performance. By reference to CPL numbers stamped on engine nameplate, this list may be used to identify parts within an engine. These parts then determine whether a fuel pump calibration is suitable for that engine.

The CPL number is stamped on the engine data (name) plate and is listed with fuel pump calibration values in the pump calibration manuals for full cross reference of information.

Any of the engine models, on the CPL list, may be built with any combination of the engine parts tabulated on that CPL without affecting engine performance.

The aneroid or AFC listed on the CPL may not be on your engine, depending upon its application. Check the fuel pump code of the original engine parts list for this item.

The fuel pump code(s) apply to a specific CPL or engine model. A fuel pump code and CPL cross reference is in the fuel pump calibration index. Do not intermix fuel pump codes and engine models or CPL's. Check the fuel pump nameplate to make sure it corresponds to the correct engine model.

The injection timing charts and specifications are included for a quick reference check, use your engine shop manual for further information on injection timing. The nominal push rod travel is given in parentheses.

Definition of CPL Headings

Control Parts List

This is the CPL. This is sometimes called the critical parts list in the factory.

Engine Models

All engine models on the CPL are listed. All engine models on a CPL may not be certified; refer to the

fuel pump code.

Certified Year and Country

This is the year the CPL is certified. All CPL's are not. Many CPL's are certified or "registered" in other countries. The engine must meet the standards of the year it was originally built. If the original certified CPL is superseded by a later certified CPL, the engine may be rebuilt to the later CPL. Do not rebuild an engine to a CPL certified before the engine was built.
