Children's Palliative Care In Africa:

Children's Palliative Care in Africa Justin Amery, 2009 Children's palliative care has developed rapidly as a discipline as health care professionals recognise that the principles of adult palliative care may not always be applicable to children at the end of life. The unique needs of dying children are particularly evident across Africa where the scale of the problem is overwhelming and the figures so enormous that they are barely comprehensible: over 400 000 children in Africa died from AIDS in 2003 and out of the 166 000 children a year diagnosed with cancer 84% of these are in the developing world. Despite the enormous need, provision of children's palliative care in Africa is almost non-existent with very few health workers trained and confident to provide care for dying children. The challenges of providing palliative care in this setting are different to those in more developed countries, contending with the shortage of physical and human resources in addition to the vast scope of the care needed. Written by a group with wide experience of caring for dying children in Africa, this book provides practical, realistic guidance on improving access to and delivery of palliative care in this demanding setting. It looks at the themes common to palliative care including communication, assessment, symptom management, psychosocial issues, ethical dilemmas, end of life care and tips for the professional on compassion and conservation of energy but always retains the focus on the particular needs of the health care professional in Africa. Whilst containing some theory, the emphasis is on practical action throughout. It will provide health care professionals working in Africa and other resource poor settings with the confidence, knowledge and capacity to improve care for the terminally ill child in constrained and demanding environments.

Perspectives on Palliative Care for Children and Young People Rita Pfund, Susan Fowler-Kerry, 2010 Advances in medical science and technology are saving the lives of more children worldwide than ever. Some survive and live out a normal life expectancy; others have a life-limiting, life-threatening diagnosis where death may come early and still others will live on well past projected life trajectories into adulthood. With so many different care pathways, children, parents and communities often find themselves facing challenges for which neither they nor their healthcare systems are prepared. This book opens a global discussion of these issues. Extending Rita Pfund's text *Palliative Care Nursing of Children and Young People*, it invites paediatric palliative care professionals, parents and children from around the globe to share their knowledge and experience. This book is of vital interest to palliative care professionals, parents, policy makers and academics. It is an important move towards ensuring that all children and their families, regardless of geographical location, gender, ethnicity or socio-economic class, have equal and guaranteed access to comprehensive paediatric palliative care services. *Pediatric Palliative Care: Global Perspectives* Caprice Knapp, Vanessa Madden, Susan Fowler-Kerry, 2012-01-03 The first of its kind, this book describes pediatric palliative care in more than 23 countries. Each region in the world is covered and countries included are both resource poor and rich. Authors are multidisciplinary and regarded nationally and internationally in their field. Clinicians, advocates, policymakers, funders and researchers will learn how programs were developed and implemented in each country.

Authors describe children for whom pediatric palliative care is needed and provided for in their country. When applicable a brief history of pediatric palliative care is included noting especially policy changes and legislative acts. For example the chapter on Poland describes how pediatric palliative care grew from the Catholic church into a national movement spearheaded by several health care workers. The Polish national spirit that brought them through a change in political regime has also been a driving force in the pediatric palliative care movement. The chapter on South Africa for example illustrates how a resource poor country has been able to leverage philanthropic and government funding to make its dream of having an infrastructure of pediatric palliative care a reality. These are just a few examples of the inspiring stories that are included in this book. Readers from countries who wish to start a pediatric palliative care program or advance an existing program will learn valuable lessons from others who have faced similar barriers. Introduction and concluding chapters highlight the strengths and weaknesses of the modern pediatric palliative care movement.

Oxford Textbook of Palliative Care for Children Richard Hain, Ann Goldman, Adam Rapoport, Michelle Meiring, 2021. Comprehensive in scope, exhaustive in detail and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data and the evolving models that support the delivery of palliative medicine to children. This book is an essential resource for anyone who works with children worldwide.

Pediatric Palliative Care Stefan J. Friedrichsdorf, 2019-02-08. This book is a printed edition of the Special Issue Pediatric Palliative Care that was published in *Children's Palliative Nursing Care*. Duncan Randall, Susan Neilson, Julia Downing, 2024-12-30. Nursing is an essential component of children's palliative care and palliative care is an essential aspect of nursing. Yet the complex interdisciplinary nature of palliative care brings into sharp focus the work nurses undertake with others in delivering palliative care. This is however a book by nurses for nurses. This comprehensive text presents the essential knowledge and skills required by nurses providing this invaluable care to a growing number of children. The chapters are mapped to the Children's Palliative Care Education and Training standards. These are endorsed by the International Children's Palliative Care Network, a major partner with the World Health Organization in the push to make children's palliative care a universal health right. In its three Parts, Children's Palliative Nursing Care covers public and universal care, core nursing and specialist care. The chapters can be read individually or cumulatively to move from engagement in public health and public understanding of palliative care through to delivering nursing care. Topics range from managing symptoms and end of life care to education, research and issues of quality and leadership. Uniquely, each chapter has been written by a team of authors who come from both high income and low middle income countries. This makes this not just a book by nurses for nurses but a global book for global nursing practice.

Children's Palliative Care: An International Case-Based Manual Julia Downing, 2020-04-01. This manual enables individuals working in children's palliative care (CPC) globally to learn through engaging real world cases. The aim is to provide a clinical case based resource that is globally relevant and accessible to those working in CPC. Drawing on case

histories from around the world that reflect key issues and elements of CPC it provides a practical approach grounded in experience It addresses multidisciplinary care in the management of children and their families discusses cases from an international perspective and shares examples from a variety of countries utilising cases across a range of ages and conditions demonstrating holistic care It represents the first case based manual on global CPC and is endorsed and promoted by the International Children s Palliative Care Network ICPCN Children s palliative care is a rapidly developing field both in the UK and internationally The provision of CPC varies considerably with provision often being insufficient and over 65% of countries having no recognised CPC service provision whatsoever As such while there are an estimated 21.6 million children who require palliative care in many areas of the world CPC is poor or non existent and children are treated like little adults without their distinctive needs being recognised or understood There is also a dearth of literature on CPC hence this clinical case based manual fills a gap in the market and is aimed at a global audience making it a unique text in the field

A Really Practical Handbook of Children's Palliative Care Justin Amery, 2016-02-24 A Really Practical Handbook of Children s Palliative Care for Doctors and Nurses Anywhere in the World offers really practical solutions to common problems faced by health professionals caring for dying children and their families whatever their culture or socioeconomic circumstance After spending more than twenty years caring for children with terminal diagnoses Dr Justin Amery has applied his hands on experience and the fruits of his research to this compendium of practical advice The book s fifteen parts address not only the numerous practical matters that arise in offering palliative care to children but also the intangible yet vital practices for communicating bad news helping families with their emotional reactions assisting children and their families with ethical and spiritual issues and working with surviving family members as they grieve The volume also includes as an additional resource the Association of Paediatric Palliative Medicine Formulary Offered at no charge as an e book

Textbook of Palliative Care Roderick Duncan MacLeod, Lieve Van den Block, 2025-02-25 This second edition provides the most up to date information on all aspects of palliative care including recent developments including COVID 19 global policies service provision symptom management professional aspects organization of services palliative care for specific populations palliative care emergencies ethical issues in palliative care research in palliative care public health approaches and financial aspects of care This new Textbook of Palliative Care remains a unique comprehensive clinically relevant and state of the art book aimed at advancing palliative care as a science a clinical practice and as an art Palliative care has been part of healthcare for over fifty years but it still needs to be explained to many Healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families However the science of palliative care is advancing and this new edition will contribute to a better understanding This new edition offers 86 updated or new chapters out of 108 written by experts in their given fields providing up to date information on a wide range of topics of relevance to those providing care towards the end of life no

matter what the disease may be We present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care The Textbook includes sections addressing aspects such as symptom management and care provision organization of care in different settings care in specific disease groups palliative care emergencies ethics public health approaches and research in palliative care This new Textbook will be of value to practitioners in all disciplines and professions where the care of people approaching death is important specialists as well as non specialists in any setting where people with serious advanced illnesses are residing It is also an important resource for researchers policy and decision makers at national or regional levels Neither the science nor the art of palliative care will stand still so the Editors and contributors from all over the world aim to keep this Textbook updated so that the reader can find new evidence and approaches to care

Oxford Textbook of Palliative Medicine Nathan I. Cherny, Marie Fallon, Stein Kaasa, Russell K. Portenoy, David Currow, 2015 Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care
