Culture And Power The Sociology Of Pierre Bourdieu:

Culture & Power David Swartz, 2024-05-31 Pierre Bourdieu is one of the world's most important social theorists and is also one of the great empirical researchers in contemporary sociology. However, reading Bourdieu can be difficult for those not familiar with the French cultural context and until now a comprehensive introduction to Bourdieu's oeuvre has not been available. David Swartz focuses on a central theme in Bourdieu's work: the complex relationship between culture and power and explains that sociology for Bourdieu is a mode of political intervention. Swartz clarifies Bourdieu's difficult concepts, noting where they have been misinterpreted by critics and where they have fallen short in resolving important analytical issues. The book also shows how Bourdieu has synthesized his theory of practices and symbolic power from Durkheim, Marx, and Weber and how his work was influenced by Sartre, Levi Strauss, and Althusser. *Culture and Power* is the first book to offer both a sympathetic and critical examination of Bourdieu's work and it will be invaluable to social scientists as well as to a broader audience in the humanities.

Symbolic Power, Politics, and Intellectuals David L. Swartz, 2022-12-22 Power is the central organizing principle of all social life from culture and education to stratification and taste. And there is no more prominent name in the analysis of power than that of noted sociologist Pierre Bourdieu. Throughout his career, Bourdieu challenged the commonly held view that symbolic power—the power to dominate—is solely symbolic. He emphasized that symbolic power helps create and maintain social hierarchies which form the very bedrock of political life. By the time of his death in 2002, Bourdieu had become a leading public intellectual and his argument about the more subtle and influential ways that cultural resources and symbolic categories prevail in power arrangements and practices had gained broad recognition. In *Symbolic Power, Politics, and Intellectuals*, David L. Swartz delves deeply into Bourdieu's work to show how central but often overlooked power and politics are to an understanding of sociology. Arguing that power and politics stand at the core of Bourdieu's sociology, Swartz illuminates Bourdieu's political project for the social sciences as well as Bourdieu's own political activism, explaining how sociology is not just science but

also a crucial form of political engagement Social Theory: Power and identity in the global era Roberta Garner, 2010-01-01 First edition published by Broadview Press 2004 **Culture, Class, and Critical Theory** David Gartman, 2012-11-12 Culture Class and Critical Theory develops a theory of culture that explains how ideas create and legitimate class inequalities in modern society This theory is developed through a critique and comparison of the powerful ideas on culture offered by Pierre Bourdieu and the Frankfurt School thinkers especially Theodor Adorno These ideas are illuminated and criticized through the development of two empirical cases on which Gartman has published extensively automobile design and architecture Bourdieu and the Frankfurt School postulate opposite theories of the cultural legitimation of class inequalities Bourdieu argues that the culture of modern society is a class culture a ranked diversity of beliefs and tastes corresponding to different classes The cultural beliefs and practices of the dominant class are arbitrarily defined as superior thus legitimating its greater share of social resources By contrast the thinkers of the Frankfurt School conceive of modern culture as a mass culture a leveled homogeneity in which the ideas and tastes shared by all classes disguises real class inequalities This creates the illusion of an egalitarian democracy that prevents inequalities from being contested Through an empirical assessment of the theories against the cases Gartman reveals that both are correct but for different parts of modern culture These parts combine to provide a strong legitimation of class inequalities *Power and Urban Space in Pre-Modern Holland* Clé Lesger, 2024-02-22 Cities and urban societies have many faces In this study the pre modern cities of Holland are presented as arenas where power relations between social classes are expressed in a more or less permanent appropriation of physical space and through discursive strategies The continuity of the power relations in the cities of Holland spanning centuries makes it urgent to look not only at the assumption of urban space as an expression of power relations within society but also at the contribution of this appropriation to the acceptance and continuity of the existing power relations in pre modern Holland Within this broad area extensive attention is paid to the very prominent and enduring appropriation of urban space in the field of housing the less permanent but violent appropriation of urban space during the public execution of scaffold punishments the maintenance of public order by civic militias and appropriation during riots and revolts In addition city descriptions maps and pictures of the pre modern cities of Holland are scrutinised for what they can reveal about the appropriation of urban spaces These themes each have an extensive historiography but they have never been brought together in an interpretative framework that fits in with Pierre Bourdieu s model of society and the work of especially John Allen on power until now Literature and Power Zhu Guohua, 2023-11-28 With reference to the theoretical framework of Michel Foucault and Pierre Bourdieu this book offers a critical investigation into such epic issues as the end of art and the inherent laws of literature s evolution while conflating the two into one major argumentation The book proceeds from Hegel s claim of the end of art to tackle the universal yet essential problem of literature its legitimacy in a sociological sense It invests Bourdieu s sociological terms power capital habitus field and so forth into the study of literature

and art while taking on other theoretical enquiries particularly the Marxist exploration into ideology as well as aspects of economics and communication studies This book will be a valuable resource for students and scholars of the sociology of literature cultural studies and those with specific interests in Chinese literature literary and art theory *Persecution, Persuasion and Power* James A. Kelhoffer, 2010 James A Kelhoffer examines an often overlooked aspect of New Testament constructions of legitimacy namely the value of Christians withstanding persecution as a means of corroborating their religious identity as Christ's followers The introductory chapter defines the problem in interaction with sociologist Pierre Bourdieu's concept of cultural capital Chapters 2-10 examine the depictions of persecuted Christians in the Pauline letters First Peter Hebrews Revelation the NT Gospels and Acts These exegetical analyses support the conclusion that assertions of standing authority and power claimed on the basis of persecution play a significant and heretofore under appreciated role in much of the NT It is also argued that depictions of persecution can have both positive implications for the persecuted and negative implications for the depicted persecutors in constructions of legitimation An epilogue considers later examples of early Christian martyrs and confessors as well as John Foxe's Book of Martyrs The epilogue also addresses the ethical and hermeneutical problem of asserting the withstanding of persecution as a basis of legitimacy in ancient and modern contexts This problem stems from the observation that although the NT authors present their construals of withstanding persecution as a basis of legitimation as if they were self evident such assertions are actually the culmination of numerous presuppositions and are therefore open to dissenting viewpoints Yet the NT authors do not acknowledge the possibility of competing interpretations or that oppressed Christians could someday become oppressors Accordingly this exegetical study calls attention to an ethical and hermeneutical problem that the NT bequeaths to the modern interpreter a problem inviting input from ethicists and other theologians **Modern Sociologists on Society and Religion** Inger Furseth, Pål

Repstad, 2021-09-30 *Modern Sociologists on Society and Religion* provides an introduction to some of the most influential figures in contemporary social theory with an emphasis on their analyses of society and religion The figures profiled include Erving Goffman Zygmunt Bauman Michel Foucault Peter L Berger Thomas Luckmann Jürgen Habermas Pierre Bourdieu Anthony Giddens Arlie Hochschild Richard Sennett and Patricia Hill Collins The introduction places these sociologists in contemporary social discourse Each chapter begins with an introduction to the main work and social analyses of the sociologist in question After a brief critical assessment it outlines their view on religion followed by examples of how other sociologists have used their theories to study religion Each chapter ends with the authors suggestions for how their perspectives can be used to analyze the role of religion in contemporary society The book provides a general introduction and overview of social analyses in modern sociology It is a rich resource for scholars and students on all levels who are interested in social theory and the complexity of religion in contemporary society *HabitusAnalysis 1* Heinrich Wilhelm Schäfer, 2015-04-20 This book is the first of three volumes of *HabitusAnalysis* that take the sociology of Pierre Bourdieu as a

starting point to develop a methodical approach to the habitus of social actors However the concept of habitus and Bourdieu's approach to language are somewhat disputed while his relationist epistemology is seldom paid tribute to The present volume therefore in its first part deals with Bourdieu's roots in relationist Neo Kantian philosophy the basic traits of his relationist sociology The second part examines Bourdieu's theoretical and empirical work on language before elaborating its own praxeological concept of language use that opens the road to a methodically and theoretically sound reconstruction of the habitus of social actors In the second volume of *HabitusAnalysis* we will carefully re read Bourdieu's theory in order to develop a disposition based theory of the habitus that emphasizes the creative potential of the linkage between mental orientations and socio structural processes classification and classes as well as dispositions and positions The method presented in the third volume will facilitate a detailed empirical analysis of the creative transformations operated by the habitus in relation with the social structures of domination and the dynamics of social differentiation
