Chinas Urban Health Care Reform From State Protection To Individual Responsibility:

China's Urban Health Care Reform Chack-kie Wong,Vai Io Lo,Kwong-Leung Tang,2006-01-01 One way to describe the importance of social policy is to say it s about what is and what might be This ethos is the driving force behind Chack Kie Wong Vai Io Lo and Kwong leung Tang s China s Urban Health Care Reform Based on a study of a mid level city in China these three scholars provide analysis and offer theory based recommendations on health care development Using a comparative policy framework supported by a legal expert s knowledge of regulatory specifications China s Urban Health Care Reform argues that a strategy with priority in economic growth as in the case of China does not bring forth cost efficiency and equity in health care for the whole nation Ultimately Wong Lo and Tang strive to offer direction for health care reform that will lead to better health care in China s cities As a result this is a work of great significance to anyone involved in public health social work public policy medicine or law

Informal Payments and Regulations in China's Healthcare System Jingqing Yang,2016-11-26 This text addresses the key issue of informal payments or red packets in the Chinese Healthcare system It considers how transactions take place at the clinical level as well as their regulation Analysing the practice from the perspectives of institutions and power structure it examines how institutional changes in the pre reform and reform era have changed the power structure between medical professions patients and the Party state and how these changes have given rise and perpetuate the practice Drawing from qualitative data from interviews of medical professionals the author recognises the medical profession as a major player in the health care system and presents their perception of the practice as the taker of red packets and their interactions with the patient and the state surrounding the illegal practice in an authoritarian power structure The books considers the institutional reasons that motivate doctors to take patients to give and the government to tolerate red packets arguing that the bureaucratization of the medical profession society of acquaintances and shortage of quality of medical services jointly create an institutional setting that has given rise to these informal payments Contributing to a rounded understanding of the problems of healthcare reform in China this book is a key read for all scholars interested in the issue of informal payments and healthcare politics in transition economies

The Effects of Social Health Insurance Reform on People's Out-of-Pocket Health Expenditure in China Kai Liu,2016-09-21 This study examines and explains the relationship between social health insurance SHI participation and out of pocket expenditures OOP as well as the mediating role the institutional arrangement of SHI plays in this relationship in China Embracing a new institutionalist approach it develops two analytical perspectives determination which identifies the mechanisms of social health insurance and strategic interaction which explores the interaction among social health insurance agencies healthcare providers patients and institutions It reveals the poor performance of social health insurance in decreasing out of pocket health expenditures caused by a trade off between the reimbursement behavior management and purchasing mechanisms of social health insurance programs Further it finds that the inequitable allocation of healthcare resources and patients

concerns regarding the benefits offset the strategies used by social health insurance agencies to manage care seeking behavior It also discovers that the complex interactions between insurance agencies doctors patients and a larger disempowering institutional surrounding restricts the purchasing efficiency of social health insurance This book is characterized by its unique synthesis of the role of the institutional arrangement of social health insurance in China the interaction between the stakeholders in health sectors and of the relationship between healthcare institutions actors and policy outcomes Providing a comprehensive overview it enables scholars and graduate students to understand the ongoing process of social health insurance reform as well as the dynamics of health cost inflation in China It also benefits policymakers by recommending a single payer model based on an evidence based investigation

The Chinese State's Retreat from Health Jane Duckett, 2012-08-21 Over the post Mao period the Chinese state has radically cut back its role in funding health services and insuring its citizens against the costs of ill health Using an analytical framework drawn from studies of state retrenchment in industrialized democracies and in post communist Eastern Europe Jane Duckett argues that the state's retreat from health in China was not a simple consequence of economic policies and market reform Just as important were the influences of health policies reform era political institutions communist party ideology and bureaucratic stakeholders Through her analysis Duckett maintains that by studying retrenchment in China the world's most populous nation and now a major global economic power we can better understand international transformations in the role of the state and the politics that shape that role The Chinese State's Retreat from Health both extends research on retrenchment politics to a major authoritarian state and contributes to piecing together understanding of the Chinese state's changing role across the economy and other social policies including housing and education It will be of interest to students and scholars of Chinese politics social policy and the Chinese health care system as well as to those with a comparative interest in health welfare states and the politics of retrenchment Jane Duckett is Professor of Chinese and Comparative Politics at the University of Glasgow UK

Financing Healthcare in China Sabrina Ching Yuen Luk, 2016-07-22 China's current social medical insurance system has nominally covered more than 95 per cent of 1.4 billion population in China and is moving towards the ambitious goal of universal health insurance coverage Challenges posed by a rapidly ageing population an inherently discriminatory design of the health insurance system the disorder of drug distribution system and an immature legal system constrain the Chinese government from realizing its goal of universal health insurance coverage in the long run This book uses a refined version of historical institutionalism to critically examine China's pathway to universal health insurance coverage since the mid 1980s It pays crucial attention to the processes of transforming China's healthcare financing system into the basic social medical insurance system alongside rapid socio-economic changes Financing Healthcare in China will interest researchers and government and think tank officials interested in the state of healthcare reforms in China Healthcare specialists outside of East Asia may also be interested in its general study of healthcare in developing countries

Scholars and students interested in the healthcare field will also find this useful *Sustainable Health and Long-Term Care Solutions for an Aging Population* Fong, Ben, Ng, Artie, Yuen, Peter, 2017-06-30 Lasting healthcare for the entire population specifically the elderly has become a main priority in society It is imperative to find ways to boost the longevity of healthcare services for all users Sustainable Health and Long Term Care Solutions for an Aging Population is a pivotal reference source featuring the latest scholarly research on issues pertinent to health cost and finding effective ways of financing healthcare for the elderly Including coverage on a number of topics such as provider accreditation corporate social responsibility and data management this book is ideally designed for policy makers academicians researchers and advanced level students seeking current research on the innovative planning and development of healthcare *Handbook on East Asian Social Policy* Misa Izuhara, 2013-01-01 Dramatic socio economic transformations over the last two decades have brought social policy and social welfare issues to prominence in many East Asian societies Since the 1990s and in response to national as well as global pressure there have been substantial developments and reforms in social policy in the region but the development paths have been uneven Until recently comparative analysis of East Asian social policy tends to have focused on the established welfare state of Japan and the emerging welfare regimes of four Tiger Economies Much of the recent debate indeed preceded China's re emergence onto the world economy In this context this Handbook brings China more fully into the contemporary social policy debates in East Asia Organised around five themes from welfare state developments to theories and methodologies to current social policy issues the Handbook presents original research from leading specialists in the fields and provides a fresh and updated perspective to the study of social policy Providing a comparative international approach this Handbook will appeal to academics researchers and students at both undergraduate and postgraduate levels working in the fields of social policy as well as policy makers and practitioners who are interested in social policy lessons from other societies *Modern China* Xiaobing Li, 2015-11-23 Providing an indispensable resource for students educators businessmen and officials investigating the transformative experience of modern China this book provides a comprehensive summary of the culture institutions traditions and international relations that have shaped today's China In Modern China author Xiaobing Li offers a resource far beyond a conventional encyclopedia providing not only comprehensive coverage of Chinese civilization and traditions but also addressing the values issues and critical views of China As a result readers will better understand the transformative experience of the most populous country in the world and will grasp the complexity of the progress and problems behind the rise of China to a world superpower in less than 30 years Written by an author who lived in China for three decades this encyclopedia addresses 16 key topics regarding China such as its geography government social classes and ethnicities gender based identities arts media and food each followed by roughly 250 short entries related to each topic All the entries are placed within a broad sociopolitical and socioeconomic contextual framework The format and writing consistency through the book reflects a Chinese perspective and allows students to compare Chinese

with Western and American views *Health Insurance Reforms in Asia* Sabrina Luk, 2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and Hong Kong were the products of Western presence in the nineteenth century It illustrates how greater attention is paid to the roles played by ideas actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms It shows that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change **China's Changing Welfare Mix** Beatriz Carrillo, Jane Duckett, 2011-06-10 This book draws attention to two neglected areas in the growing body of research on welfare in China subnational variation and the changing mix of state and non state provision The contributors to this volume demonstrate the diversity of local welfare provision that lies behind broad national policies and programmes Their focus on local diversity is particularly relevant to understanding the welfare system in China because national state programmes are so often organized by local governments in line with the specifics of their economic and social development At the same time that social and economic development is itself independently creating an array of different conditions that shape non state family business and third sector welfare roles Through chapters that draw on original research in eight provinces the book adopts a local perspective to illustrate and explain some of the transformations that are under way and discuss not only local government initiatives and programmes but also the services and support provided by families informal social networks and community or third sector organizations as well as those delivered by private businesses on a commercial for profit basis This book will be of interest to students and scholars of Chinese society social policy and Chinese studies more widely Beatriz Carrillo is Lecturer in Asian Studies at the University of Technology Sydney Australia Jane Duckett is Professor of Chinese and Comparative Politics at the University of Glasgow UK
