Wingate, 2016-12-31 Every individual develops physically and psychologically through distinct stages of life With each stage grows a wider perspective of self and the world around us In Circuits and Shen models of the evolution of consciousness and Chinese medicine the spectrum of human consciousness is explored from the view of the eight circuit model of the brain and the holonomic theory of development It is shown how these relate to brain development psychoneuroendocrinology and holding patterns of the fascial networks throughout the body as well as Eastern subtle body systems Utilizing this information it becomes possible to lay out a systematic means of informing Chinese medical practitioners and bodyworkers in approaches aimed at treating negative imprints psychological impacts or physical illnesses that may develop out of each stage

Breathing, Mudras and Meridians Bill Harvey, 2021-07-22 The word embodied is one of those terms such as grounded or centered that can be discussed forever without being experienced Defining embodiment though can be quite tricky because much of what is taught in western societies about the body devalues the felt experience The categories of formal learning particularly anatomy and physiology are taught with the fundamental source being cadavers dead bodies and

conceptualizations that do not include our own vitality or life force Without the felt experience embodiment is just another concept that can be discussed ad nauseum The felt experience or phenomenology in academic speak is the path away from these endless discussions and conceptual befuddlement This book provides a basic training on how to become aware of our physiological functioning and our sense of vitality A part of this training comes from becoming hyper aware of how we breathe This awareness makes it possible to feel our own organs and how they function and interrelate To help us refine our awarenesses of our own organs we are entirely fortunate to learn and practice methods developed over thousands of years by Indian and Chinese cultures With these fundamentals this book leads us through a series of connected experiences using mudras to feel our organs the flows of our life force Qi and the flow of that life force through our meridians From that we learn to feel our own chakras and sushumna central channel and our ability to perceive our connections with our environment and ecosystem This then provides the basis for a body sense of our spiritual existence and development Thus the definition of embodiment evolves into deeper awareness within our bodies and deeper connection to the world
