Chen Village Revolution To Globalization:

Chen Village Anita Chan, Richard Madsen, Jonathan Unger, 2009-04 Chen Village has been acclaimed as a modern classic. The book's first two editions presented an enthralling and beautifully written account of a Chinese village in the throes of Maoist revolution with tumultuous political campaigns, power struggles, a Cultural Revolution rebellion, and radical shifts in social customs, followed by dramatic changes in village life and local politics during the Deng Xiaoping period. Now more than a decade and a half later, the authors have returned to Chen Village and in three new chapters they explore astonishing developments. The once backwater village is today a center of China's export industry where more than 50,000 workers labor in modern factories ruled over by the village government. The new chapters show how the latest swing in fortunes has affected the village's self-identity, customs, and entrepreneurship while laying bare the stark situation of the workers who crowd in from poor parts of China's countryside. This new edition of *Chen Village* illuminates in microcosm the recent history of rural China up to the present time.

China's Regions in an Era of Globalization Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization, yet China is a continent-sized economy and society with substantial diversity across its different regions. This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions. This book responds to this challenge by looking at the development of China's regions in this era of globalization. It traces the evolution of regional policy in China and its implications in a global context. Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China, the globalization of the inland mega-city of Chongqing, and the role of China's regions in the globally focused Belt and Road initiative launched by the Chinese government in late 2013. The book will be of interest to practitioners and scholars engaging with contemporary China's political economy and international relations.

The Art of Political Control in China Daniel C. Mattingly, 2019-12-05 When and why do people obey political authority when it runs against their own interests to do so? This book is about the channels beyond direct repression through which China's authoritarian state controls protest and implements ambitious policies from sweeping urbanization schemes that have displaced millions to family planning initiatives like the one-child policy. Daniel C. Mattingly argues that China's remarkable state capacity is not simply a product of coercive institutions such as the secret

police or the military Instead the state uses local civil society groups as hidden but effective tools of informal control to suppress dissent and implement far reaching policies Drawing on evidence from qualitative case studies experiments and national surveys the book challenges the conventional wisdom that a robust civil society strengthens political responsiveness Surprisingly it is communities that lack strong civil society groups that find it easiest to act collectively and spontaneously resist the state

Heaven Cracks, Earth Shakes James Palmer, 2012-01-03 Documents the tumultuous years in China surrounding the death of Chairman Mao covering such factors as growing anger towards the Gang of Four the devastating 1976 earthquake in Tangshan and resistance to the Cultural Revolution

China's Agrarian Transition René Trappel, 2015-12-18 More than thirty years ago the political turn that brought the dismantling of agricultural collectives and exclusive rights to small plots of farmland for rural families initiated a historic return to smallholding in the People's Republic of China Today agriculture in China is changing again In many villages smallholder farming is giving way to large agricultural enterprises This book explores this latest transformation of Chinese agriculture It traces how the peasantry's frustration with the farming conditions the priorities of national and local political agents and the changes in the management of collective land since the return to family based farming have paved the way for a unique Chinese agrarian transition The argument is based on careful analysis of agricultural politics since the early 1980s and data gathered in three field trips to Shandong Sichuan and Guizhou Provinces between 2008 and 2010 The findings highlight the importance of institutional path dependencies and strategic government intervention or its absence for economic transformation China's Agrarian Transition is one of the first comprehensive accounts of the latest developments in agriculture in the People's Republic and will provide a stimulating read for political scientists sociologists economists and experts on China interested in the ongoing transformation of China's countryside

world For more than a century inhabitants of Shenzhen's villages have migrated to Southeast Asia the Pacific North and South America and Europe With China's economic global ascendancy these villages no longer consist of peasants dependent on their rich overseas relatives As the villages have become part of the special economic zone of Shenzhen the megacity that embodies China's rise emigration has waned Lineage ties have long been central in choosing migration destinations and channeling donations to village projects After China's reopening Shenzhen's villagers used diaspora as a resource to participate in the city's booming economy and to reestablish and protect their ritual sites against government plans As overseas financial contributions diminish and diasporic relations change Anne Christine Tr mon highlights the way emigration is being reconceptualized in regards to China's changing position in the world offering a new perspective on Chinese globalization and the politics of scale making
