Countdown Our Last Best Hope For A Future On Earth:

Countdown Alan Weisman, 2013-09-24 A powerful investigation into the chances for humanity's future from the author of the bestseller *The World Without Us* In his bestselling book *The World Without Us* Alan Weisman considered how the Earth could heal and even refill empty niches if relieved of humanity's constant pressures Behind that groundbreaking thought experiment was his hope that we would be inspired to find a way to add humans back to this vision of a restored healthy planet only in harmony not mortal combat with the rest of nature But with a million more of us every 4 1 2 days on a planet that's not getting any bigger and with our exhaust overheating the atmosphere and altering the chemistry of the oceans prospects for a sustainable human future seem ever more in doubt For this long awaited follow up book Weisman traveled to more than 20 countries to ask what experts agreed were probably the most important questions on Earth and also the hardest How many humans can the planet hold without capsizing How robust must the Earth's ecosystem be to assure our continued existence Can we know which other species are essential to our survival And how might we actually arrive at a stable optimum population and design an economy to allow genuine prosperity without endless growth Weisman visits an extraordinary range of the world's cultures religions nationalities tribes and political systems to learn what in their beliefs histories liturgies or current circumstances might suggest that sometimes it's in their own best interest to limit their growth The result is a landmark work of reporting devastating urgent and ultimately deeply hopeful By vividly detailing the burgeoning effects of our cumulative presence *Countdown* reveals what may be the fastest most acceptable practical and affordable way of returning our planet and our presence on it to balance Weisman again shows that he is one of the most provocative journalists at work today with a book whose message is so compelling that it will change how we see our lives and our destiny

Time to Stand Up Thanissara, 2015-08-18 *Time to Stand Up* retells the story of the historical Buddha one of the greatest sacred activists of all time as a practical human being whose teachings of freedom from suffering are more relevant than ever in this time of global peril Evolving onward from the patriarchal template of spiritual warriors and their quests former nun Thanissara explores awakening from within a feminine view where the archetypes of lover and nurturer are placed as central and essential for a sustainable world Vital is an investigation into the pinnacle of Buddhist practice the realization of the liberated heart Thanissara questions the narrative of transcendence and invites us into the lived reality of our deepest heart as it guides our journey of healing reclamation and redemption As the book unfolds the author examines traditional Buddhism often fraught with gender discrimination and asks the important question Can Buddhist schools overly attached to hierarchal power structures and often divorced from the radical and free inquiry exemplified by the Buddha truly offer the ground for maturing awakening without undertaking a fundamental review of their own shadows Chapter by chapter the book relates Siddhartha Gautama's awakening to the sea change occurring on Earth in present time as we as a civilization become aware of the ethical bankruptcy of the nuclear and fossil fuel industry and the psychopathic corporate

and military abuse of power currently terrorizing our planet Thanissara relates the Buddha's story to real life individuals who are living through these transitional times such as Iraq war veterans First Nation People and the Dalai Lama Time to Stand Up gives examples of the Buddha's activism such as challenging a racist caste system and violence against animals stopping war transforming a serial killer and laying down a nonhierarchical structure of community governance actions that would seem radical even today Thanissara explores ways forward deepening our understanding of meditation and mindfulness probing its use to pacify ourselves as the cogs in the corporate world by helping people be more functional in a dysfunctional systems and shows how these core Buddhist practices can inspire a wake up call for action for our sick and suffering planet Earth About the Sacred Activism series When the joy of compassionate service is combined with the pragmatic drive to transform all existing economic social and political institutions a radical divine force is born Sacred Activism The Sacred Activism Series published by North Atlantic Books presents leading voices that embody the tenets of Sacred Activism compassion service and sacred consciousness while addressing the crucial issues of our time and inspiring radical action

The End of Doom Ronald Bailey, 2024-08-06 In the past five decades there have been many many forecasts of impending environmental doom They have universally been proven wrong Meanwhile those who have bet on human resourcefulness have almost always been correct In his widely praised book Ecoscam Ronald Bailey strongly countered environmentalist alarmism using facts to demonstrate just how wildly overstated many claims of impending ecological doom really were Now twenty years later the Reason Magazine science correspondent is back to assess the future of humanity and the global biosphere Bailey finds contrary to popular belief that many present ecological trends are quite positive Including Falling cancer incidence rates in the United States The likelihood of a declining world population by mid century The abundant return of agricultural land to nature as the world reaches peak farmland A proven link between increases in national wealth and reductions in air and water pollution Global warming is a problem but the cost of clean energy could soon fall below that of fossil fuels In The End of Doom Bailey avoids polemics and offers a balanced fact based and ultimately hopeful perspective on our current environmental situation Now isn't that a breath of fresh air

How to Think about the Climate Crisis Graham Parkes, 2020-11-26 Choice Outstanding Academic Title 2021 Coping with the climate crisis is the greatest challenge we face as a species We know the main task is to reduce our emissions as rapidly as possible to minimise the harm to the world's population now and for generations to come What on earth can philosophy offer us In this compelling account of a problem we think we know inside out the philosopher Graham Parkes outlines the climatic predicament we are in and how we got here and explains how we can think about it anew by considering the relevant history science economics politics and for the first time the philosophies underpinning them Introducing the reality of global warming and its increasingly dire consequences he identifies the immediate obstructions to coping with the problem outlines the libertarian ideology behind them and shows how they can be circumvented Drawing on the wisdom of the ancients in both the East Asian and Western

traditions as embodied in such figures as Confucius Laozi Zhuangzi Dogen Plato Epicurus Marcus Aurelius and Nietzsche Parkes shows how a greater awareness of non Western philosophies and especially the Confucian political philosophy advocated by China can help us deal effectively with climate change and thrive in a greener future If some dominant Western philosophical ideas and their instantiation in politics and modern technology got us into our current crisis Parkes demonstrates persuasively that expanding our philosophical horizons will surely help get us out **On the Verge** Rebecca D. Costa,2017-09-06 The author of *The Watchman's Rattle* has done it again *On the Verge* shows how predictive technologies and science are redefining modern leadership George Mitchell former Senate Majority Leader There can be no greater advantage than certainty of the future Not in nature Not in business Not in governance So begins Rebecca Costa's much awaited exploration of foresight the crowning achievement of human ambition According to Costa advances in Big Data predictive analytics genomics artificial intelligence and other breakthroughs have made it possible to pinpoint future results with mind blowing accuracy cracking the door to what Costa calls predaptation the ability to adapt before the fact Never before has the information needed to avert danger get the jump ahead of others or prepare for the inevitable been so clearly within grasp Through fascinating real life examples Costa reveals how technology has brought nations businesses and individuals to the edge of clairvoyance Yet our ability to act on foreknowledge often falls short causing leaders to squander the advantage of preemption To counteract this failure Costa illuminates 12 principles of adaptation and predaptation used to succeed in fast moving environments In the spirit of the best in popular science *On the Verge* is a landmark examination of big picture forces affecting society today Costa's unique sociobiological perspective combined with her ability to blend humor breaking science and insightful personal stories distinguishes her as one of the most important thought leaders of our time If you have an insatiable curiosity about the impact of innovation on our world ahead and how the future can be manipulated you will love this book John Sculley former CEO of Apple and President of Pepsi Cola **Ecocritical Aesthetics** Peter Quigley,Scott Slovic,2018-02-28 This lively collection of essays explores the vital role of beauty in the human experience of place interactions with other species and contemplation of our own embodied lives Devoting attention to themes such as global climate change animal subjectivity environmental justice and activism and human moral responsibility for the environment these contributions demonstrate that beauty is not only a meaningful dimension of our experience but also a powerful strategy for inspiring cultural transformation Taken as a whole they underscore the ongoing relevance of aesthetics to the ecocritical project and the concern for beauty that motivates effective social and political engagement **America's Most Alarming Writer** Bill Broyles,Bruce J. Dinges,2019-11-15 The author of more than twenty books and a revered contributor to numerous national publications Charles Bowden 1945 2014 used his keen storyteller's eye to reveal both the dark underbelly and the glorious determination of humanity particularly in the borderlands between the United States and Mexico In *America's Most Alarming Writer* key figures in his life including his editors collaborators and other writers deliver

a literary wake of the man who inspired them throughout his forty year career Part revelation part critical assessment the fifty essays in this collection span Bowden s rise as an investigative journalist through his years as a singular voice of unflinching honesty about natural history climate change globalization drugs and violence As the Chicago Tribune noted Bowden wrote with the intensity of Joan Didion the voracious hunger of Henry Miller the feral intelligence and irony of Hunter Thompson and the wit and outrage of Edward Abbey An evocative complement to The Charles Bowden Reader the essays and photographs in this homage brilliantly capture the spirit of a great writer with a quintessentially American vision Bowden is the best writer you ve n ever read

Companion to Environmental Studies Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

Climate Lyricism Min Hyoung Song, 2021-11-08 Min Hyoung Song articulates a climate change centered reading practice that foregrounds how literature poetry and essays help us to better grapple with our everyday encounters with climate change

[The Moral Arc](#) Michael Shermer, 2015-01-20 The New York Times bestselling author of *The Believing Brains* explores how science makes us better people From Galileo and Newton to Thomas Hobbes and Martin Luther King Jr thinkers throughout history have consciously employed scientific techniques to better understand the non physical world The Age of Reason and the Enlightenment led theorists to apply scientific reasoning to the non scientific disciplines of politics economics and moral philosophy Instead of relying on the woodcuts of dissected bodies in old medical texts physicians opened bodies themselves to see what was there instead of divining truth through the authority of an ancient holy book or philosophical treatise people began to explore the book of nature for themselves through travel and exploration instead of the supernatural belief in the divine right of kings people employed a natural belief in the right of democracy In *The Moral Arc* Shermer explains how abstract reasoning rationality empiricism skepticism scientific ways of

thinking have profoundly changed the way we perceive morality and indeed move us ever closer to a more just world Michael Shermer is a beacon of reason in an ocean of irrationality Neil deGrasse Tyson A memorable book a book to recommend and discuss late into the night Richard Dawkins A brilliant contribution Sherman s is an exciting vision Nature
