System Overview

The Cerberus PRO Fire Safety System — a new dimension in fire protection from Siemens Industry — Fire Safety — is a technologically advanced fire-and-life-safety system. Each Cerberus PRO system provides easy operation via its push-button soft keys; a backlit, 2" —x— 4-3/4" LCD screen; as well as a (4) four-way navigation push button — all located in the upper portion of each panel.

Through the use of its unique multiprocessor "Network" design — along with its ability to utilize intelligent detection devices — Cerberus PRO epitomizes a flexible and highly configurable fire system. SureWire™ addressable-loop technology is supported by Cerberus PRO.

Cerberus PRO is ideally suited for small and mid-market applications by providing 50, 252 and 504-point addressable fire-alarm-control-panel (FACP) networking.

In conjunction with these new and improved FACP's is a state-of-the-art line of intelligent detectors. For example, the Multi-Criteria Fire / CO Detector [with ASAdetector™] is cutting-edge technology for specialized applications — such as carbon-monoxide detection — compared to standardized detectors, while the Photo-electric Smoke Detector uses microcontroller circuitry and surface-mount technology for maximum reliability.

The Cerberus PRO Fire Safety System is (UL 864 9th Edition Listed).
