Costas Question Stems:

Self-Determination and Collective Responsibility in the Secessionist Struggle Costas Laoutides, 2016-03-03 The often violent emergence of new independent states following the end of the Cold War generated discussion about the normative grounds of territorial separatism A number of opposing approaches surfaced debating whether and under which circumstances there is a right for a community to secede from its host country Overwhelmingly these studies placed emphasis on the right to secession and neglected the moral stance of secessionist movements as agents in international relations In this book Costas Laoutides explores the collective moral agency involved in secessionist struggles offering a theoretical model for the collective responsibility of secessionist groups Case studies on the Kurds and the people of Moldova Transdnistria illustrate the author's theoretical arguments as he seeks to establish how although the principle of self-determination was envisaged as a means of gradually bestowing political power upon the people it never managed to realize its full potential because it was interpreted strictly within a framework of exclusionary politics of identity

Transprofessional Diplomacy Costas M. Constantinou,Noé Cornago,Fiona McConnell,2017-01-05 Diplomacy is no longer restricted to a single vocation nor implemented exclusively through interaction amongst official representatives In exploring the challenges that these transformations produce this work surveys firstly the genealogy of diplomacy as a profession tracing how it changed from a civic duty into a vocation requiring training and the acquisition of specific knowledge and skills Secondly using the lens of the sociology of professions the development of diplomacy as a distinctive profession is examined including its importance for the consolidation of the power of modern nation states Thirdly it examines how the landscape of professional diplomacy is being diversified and we argue enriched by a series of non state actors with their corresponding professionals transforming the phenomenology of contemporary diplomacy Rather than seeing this pluralization of diplomatic actors in negative terms as the deprofessionalization of diplomacy we frame these trends as transprofessionalization that is as a productive development that reflects the expanded diplomatic space and the intensified pace of global interconnections and networks and the new possibilities they unleash for practising diplomacy in different milieus

A Missiology of the Road J Kevin Livingston,2014-09-25 David Bosch 1929 1992 was one of the foremost mission theologians of the twentieth century a prolific scholar committed church leader and active participant in the global conciliar and evangelical mission movements His distinctive role in the South African church's struggle against apartheid is less well known however After reviewing Bosch's background and exploring key themes in his understanding of mission and

evangelism Livingston explores Bosch's legacy from the perspective of the missionary nature of the church. The church is God's kingdom community acting as a witness to and instrument of the coming reign of God. The church is God's alternative community simultaneously set apart from the world but also existing for the sake of the world, exemplifying the radical implications of Christ's new community. It is also God's reconciled and reconciling community serving as a sign and embodiment of God's love in Christ. For those acquainted with Bosch only as the author of his magisterial *Transforming Mission: A Missiology of the Road*, this book shows how Bosch integrated his theology and practice in a faithful, contextually relevant way within South Africa and the global church.

Perspectives on Greek Musical Modernism Eva Mantzourani, Costas Tsougras, Petros Vouvaris, 2025-03-24. This is the first book to investigate systematically the diverse aspects and compositional approaches of Greek musical modernism. The volume contributes to ongoing discussions about aesthetic modernism in general and the epistemological issues that pertain to its historiography, especially with respect to challenging the centre-periphery dichotomy that has previously informed its conceptual framework. The book strikes a balance between offering thematically focused contributions and serving as a reference source for scholars interested in looking more thoroughly into unexamined or overlooked aspects of musical modernism. To do so, it encompasses a variety of case studies presented in a series of 13 chapters that cover a wide array of methodological approaches from historical and critical to analytical and philosophical. These chapters are organised along the lines of a historical narrative that traces the reception of musical modernism in Greece, ranging from outright rejection during the mid-war period to affirmative institutionalisation in the post-war years. In this context, the book will interest not only musicians, musicologists and music theorists but also cultural historians and other scholars involved in studying the emergence, development and dissemination of modernism worldwide.
