De Industrialisatie Van Europa 1780 1914:

De industrialisatie van Europa, 1780-1914 William Otto Henderson, 1971 **Economic Growth in Britain and France 1780-1914** Patrick O'Brien, Çağlar Keyder, Çağlar Keyder, 2011 First published in 1978 Professor O'Brien's *Economic Growth in Britain and France 1780-1914* is an original and pioneering exercise in comparative and quantitative economic history. It finds a controversial place in the debate on the question of French retardation in the 19th century and as a brave and important contribution towards the understanding of economic growth in Western Europe. The author attempts to comprehend and evaluate the economic performance of France through explicit comparisons with Britain while considering British economic history from a French perspective. Challenging the orthodox view that France lagged behind Britain in economic terms, the book argues that there were two paths of economic growth to the 20th century with France's path seen as a more humane and no less efficient transition to industrial society. **Freedom and Capitalism in Early Modern**

Europe Philipp Robinson Rössner, 2020-10-12 This book hinges upon ideas and discourses variously known under labels such as Mercantilism and Cameralism. Often viewed as antithesis of capitalism, inclusive institutions and good economy in the West, this book re-assembles them and builds them into a coherent origin story of modern capitalism. It explores the field of intellectual and conceptual history, especially the history of Renaissance and Mercantilism in a longer history of capitalism. Rather than hindrances, the author argues that Mercantilist and Cameralist political economies presented essential stepping stones of modern capitalism in Britain and beyond. This book will be of interest to academics and students in general economic history, the history of capitalism, economic development, and the history of economic thought. [An Economic History of Europe](#) Antonio Di Vittorio, 2006-09-27 *An Economic History of Europe* provides students with a comprehensive introduction to European economic history from the fifteenth century to the present day. Individual chapters offer brief references to previous historical periods and events, with special attention given to core themes concerning economic development and an analysis of their change through time and space. Core themes examined in each period include the increasing prominence of industry, international trade, demand and supply dynamics, agriculture. The unique structure of this text enables students not only to gain a firm grounding in the long-term evolution of the European economy but also provides an historical overview of the economic development of individual countries. Individual contributors analyze the shift from the modern to the contemporary period and offer a broad explanation of the historical roots of the problems that face today's economic development. This key text is indispensable reading for students in economics, economic history, development economics, and history. [Medical Missionaries and Colonial Knowledge in West Africa and Europe, 1885-1914](#) Linda Maria Ratschiller Nasim, 2023-11-02 This open access book offers an entangled history of hygiene by showing how knowledge of purity, health, and cleanliness was shaped by evangelical medical missionaries and their encounters with people in West Africa. By tracing the interactions and negotiations of six Basel Mission doctors who practised on the Gold Coast and in Cameroon.

from 1885 to 1914 the author demonstrates how notions of religious purity scientific health and colonial cleanliness came together in the making of hygiene during the age of High Imperialism The heyday of evangelical medical missions abroad coincided with the emergence of tropical medicine as a scientific discipline during what became known as the Scramble for Africa This book reveals that these projects were intertwined and that hygiene played an important role in all three of them While most historians have examined modern hygiene as a European bourgeois and scientific phenomenon the author highlights both the colonial and the religious fabric of hygiene which continues to shape our understanding of purity health and cleanliness to this day *Les territoires de l'industrie en Europe, 1750-2000* Jean-Claude Daumas, Pierre Lamard, Laurent Tissot, 2007 Contributions un colloque interdisciplinaire sur les districts industriels organisés dans le cadre d'un programme international de recherche sur les dynamiques territoriales de l'industrialisation en Europe Présenté des études sur les systèmes productifs localisés leurs rapports avec les territoires sur lesquels ils sont implantés le rôle des entreprises dans leur développement etc *Europe 1700-1992: L'età delle rivoluzioni* Marco Guidi, Nanda Torcellan, 1991 **De ethiek van Erich Fromm** E.
