2 HOW TO DETERMINE MODEL VARIATION

The Manual is further corrected by the last TWO letters in the model designation number, i.e., B-700 in this example, and is sometimes followed by additional letters or numbers. All present models and future production will have numbers only following the basic model number. The lettering system has been discontinued. Due to varied nomenclature of other users, there may be a large number of models. A complete list of these models, referred to as **MODEL VARIATIONS**, will be found following each Basic Parts List. Under the new system of assigning model variation numbers, the last variation from the standard design will end with "000". A typical model number might be 1200-000 for the complete Model Variation B-700. The Basic Parts List will tell each part or assembly one number. The Model Variation B-700 will be assigned to it. The last two digits of the Basic Parts List, in the case of the same part shown above, by looking in the Model Variation List following the Basic Parts List for the B-700 section, one finds that the B-700-000 has a special cross-hatch, a gear reduction assembly and that the gear reducer is mounted in the 1200 position. If for instance a gear is needed, i.e., for the gear reducer, then one goes down to Section 12 (gear reducer) and look up the part under the appropriate assembly number in the case 2000.

You must also determine the basic TYPE of your engine. The TYPE is a Chrysler engine & always shown as a Six-Cyl. FIVE-Valve Cylinder and Head Assembly. 120000 is its max. horsepower.

There will be a separate Division in Section II for each type change of an engine which is a special variation of the base model of the three basic lines.

Does any one (ED) have copies of the B-200 Noddy studies?

1. Two Serial Number suffixes—referred to as "Type B" etc.,
2. Serial Number suffix "A"—referred to as "Type A,"
3. Serial Number suffix "m"—referred to as "Type B," etc., etc.

These are the Master Types and are covered by the Basic Parts List. Whenever a part or assembly is not used on all Types, this will be noted. If no note appears, this means that the part will be found on ALL types.

SECTION 1: PRICE LIST contains descriptions of the various engine Series and up to date Suggested prices will furnish the current prices for replacement engines with or without accessories. Tables B of this section is a convenient Form Price List. **ALWAYS CHECK PART NUMBERS WITH THE PRICE LIST** to make sure that this part is available on the current PRICE LIST. **ALWAYS ORDER BY PART NUMBER.**
