United States-China-India Strategic Triangle in the Indian Ocean Region Dr Sithara Fernando, 2015-04-15 While the strategic dynamics in the IOR are complex and involve many powers there is little doubt that the strategic triangle involving the US China and India is one of the key traditional security issues facing the IOR Given Sri Lanka's geopolitically significant location in the IOR this strategic triangle is bound to have an impact on its national interests and security The central questions raised by this volume are the following What are the prospects of competition and cooperation within the strategic triangle What structure or pattern will the triangular relations assume How can stability be maintained in the triangular relationship in the interest of peace in the IOR and What would be the impact of this strategic triangle on a small country such as Sri Lanka situated in a geopolitically significant location in the IOR The dynamics of the US China India strategic triangle in the IOR will be complicated containing elements of both competition and cooperation The research contained in the substantive chapters of this volume present a multiplicity of views on the possible patterns that the strategic triangle can assume Based on Harry Harding's typology of the strategic triangle in international affairs these include one mediating the conflict between the other two two against one and all working together The multiplicity of patterns that the strategic triangle could assume indicate that there is likely to be considerable fluctuation in its structure What is important in maintaining stability is that the competition is not allowed to become unmanageable and the fostering of cooperation based on common interests The US China India strategic triangle poses Sri Lanka as a country situated in a geopolitically significant location in the IOR with both challenges and opportunities The most fundamental challenge is posed by the tendency of each of these three major powers to subordinate Sri Lanka to their grand strategic objectives and interaction with each other The fundamental opportunity presented to Sri Lanka by the strategic triangle is that of using its geopolitical importance to each of these three major powers by virtue of its location in the IOR to its own advantage in a way that best serves its national interests

China and EU Jing Men, Annika Linck, 2017-05-12 Reform and governance are of vital interest to both the People's Republic of China and the European Union EU China is facing demographic and environmental challenges and has been experiencing a rapid economic transition The social tensions arising from these challenges call for a governance system that will allow the Chinese leadership to alleviate social tensions without putting at risk their leadership A society which is becoming more diverse and facing problems of a global scale that also cause turmoil at the grass roots

may be difficult to govern top down Notwithstanding the Communist Party of China s CPC grip on Chinese society there may be ways to integrate public opinion and civil society organisations in governmental decision making through reforms that do not challenge the current leadership The EU on the other hand faces the same global challenges with a very different and complex governance system EU foreign and security policy thus including EU policy towards China are governed by the EU s foreign policy principles which contain among others the promotion of democracy the rule of law and the universality and indivisibility of human rights and fundamental freedoms How successful can the EU be in advancing these principles when engaging with China while respecting the Chinese political system How can the EU and China find common grounds in their governance systems so as to enhance their strategic partnership in order to tackle global issues that need a coordinated approach
