Cable Shielding For Electromagnetic Compatibility:

Cable Shielding for Electromagnetic Compatibility Anatoly Tsaliovich, 2012-12-06 The mathematical theory of wave propagation along a conductor with an external coaxial return is very old going back to the work of Rayleigh Heaviside and J J Thomson These words were written by S A Schelkunoff back in 1934 Indeed those early works dealt with signal propagation along the line as well as electromagnetic shielding of the environment inside and or outside the metallic enclosures Maxwell himself developed pioneering studies of single layer shielding shells while a paper with such a modern title as On the Magnetic Shielding of Concentric Spherical Shells was presented by A W Rucker as early as 1893 Such state of the art shielding theory created in the last century is even more amazing if you think that at almost the same time namely in 1860s a manuscript of Jules Verne's book Paris in the xx Century was rejected by a publisher because it predicted such outrageously incredible electrotechnology as for example FAX service by wires and the electrocutioner's chair With regard to the last invention I suspect many readers would rather Jules Verne has been wrong However although the beginning of electromagnetic shielding theory and its implementation to electronic cables date back more than a century this dynamic field keeps constantly growing driven by practical applications **Electromagnetic Compatibility** David
