Challenging Southeast Asian Development The Shadows Of Success:

Challenging Southeast Asian Development Jonathan Rigg, 2015-07-30 Over the course of the last half century the growth economies of Southeast Asia Indonesia Malaysia the Philippines Singapore Thailand and Vietnam have transformed themselves into middle income countries This book looks at how the very success of these economies has bred new challenges novel problems and fresh tensions including the fact that particular individuals sectors and regions have been marginalised by these processes Contributing to discussions of policy implications the book melds endogenous and exogenous approaches to thinking about development paths re frames Asia s model s of growth and draws out the social environmental political and economic side effects that have arisen from growth An interesting analysis of the problems that come alongside development s achievements this book is an important contribution to Southeast Asian Studies Development Studies and Environmental Studies Routledge Handbook of Southeast Asian Development Andrew McGregor, Lisa Law, Fiona Miller, 2017-11-06 Southeast Asia is one of the most diverse regions in the world hosting a wide range of languages ethnicities religions economies ecosystems and political systems Amidst this diversity however has been a common desire to develop This provides a uniting theme across landscapes of difference This Handbook traces the uneven experiences that have accompanied development in Southeast Asia The region is often considered to be a development success story however it is increasingly recognized that growth underpinning this development has been accompanied by patterns of inequality violence environmental degradation and cultural loss In 30 chapters written by established and emerging experts of the region the Handbook examines development encounters through four thematic sections Approaching Southeast Asian development Institutions and economies of development People and development and Environment and development The authors draw from national or sub national case studies to consider regional scale processes of development tracing the uneven distribution of costs risks and benefits Core themes include the ongoing neoliberalization of development issues of social and environmental justice and questions of agency and empowerment This important reference work provides rich insights into the diverse impacts of current patterns of development and in doing so raises questions and challenges for realizing more equitable alternatives It will be of value to students and scholars of Asian Studies Development Studies Human Geography Political Ecology and Asian Politics Alternative Histories of Development in Japan and East Asia Timothy D. Amos, Akiko Ishii, Samson Lim, 2025-07-31 This book examines the history of development in East Asia in terms of material change and human nature relations from the perspectives of people living in Asia in modern and pre modern periods By challenging the reader to unthink what modern development is each chapter offers a case study which discovers and reconstructs indigenous forms of knowledge and local practice related to material change In doing so the book illuminates the point where modern notions of development emerged and thus aids in the process of understanding how they achieved hegemonic status This in turn expands the notion of what development can and should entail and provides valuable

pathways for rethinking our relations with the social world and the environment This book will be a valuable resource to students and scholars of Asian development Asian history and environmental history

Rural Development in Southeast Asia Jonathan Rigg, 2020-10-01 Rural areas and rural people have been centrally implicated in Southeast Asia's modernisation Through the three entry points of smallholder persistence upland dispossession and landlessness this Element offers an insight into the ways in which the countryside has been transformed over the past half century Drawing on primary fieldwork undertaken in Laos Thailand and Vietnam and secondary studies from across the region Rigg shows how the experience of Southeast Asia offers a counterpoint and a challenge to standard historicist understandings of agrarian change and more broadly development Taking a rural view allows an alternative lens for theorising and judging Southeast Asia's modernisation experience and narrative The Element argues that if we are to capture the nature and not just the direction and amount of agrarian change in Southeast Asia then we need to view the countryside as more than rural and greater than farming

Land and Development in Indonesia John F McCarthy, 2017-03-09 Indonesia was founded on the ideal of the Sovereignty of the People which suggests the pre-eminence of people's rights to access use and control land to support their livelihoods Yet many questions remain unresolved How can the state ensure access to land for agriculture and housing while also supporting land acquisition for investment in industry and infrastructure What is to be done about indigenous rights Do registration and titling provide solutions Is the land reform agenda legislated but never implemented still relevant How should the land questions affecting Indonesia's disappearing forests be resolved The contributors to this volume assess progress on these issues through case studies from across the archipelago from large scale land acquisitions in Papua to asset ownership in the villages of Sulawesi and Java to tenure conflicts associated with the oil palm and mining booms in Kalimantan Sulawesi and Sumatra What are the prospects for the people's sovereignty in regard to land

Development and Distribution Andy Sumner, 2018-07-03 Since the Second World War surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations East Asia has exceeded most regions in its achievement of convergence and much has been written on comparative industrialization and development in North East Asia Less discussed is South East Asia and the surprising and inclusive transformation several of its countries has undergone Development and Distribution focuses on South East Asia and more specifically on Malaysia Indonesia and Thailand These three nations have all undergone a major transformation in a way never anticipated from being poor agrarian countries to middle income countries with developed industrial and manufacturing bases How did Malaysia Indonesia and Thailand achieve such a transformation and how did they achieve the transformation with a form of economic growth that was driven by structural transformation but that was inclusive Given that historically it has been thought that structural transformation tends to push up inequality whilst inclusive growth necessitates static or even falling inequality this last point is particularly salient to developing countries Understanding how

the transformation was possible in a relatively small space of time the extent to which it was inclusive and the caveats and prospects for South East Asia is thus an area of enquiry significant to all developing countries as they seek economic and social transformation

More than Rural Jonathan Rigg, 2019-02-28 In the 1970s Thailand was developing but poor and largely agrarian By the 1980s it had become the fastest growing large economy in the world and in the process made the transformation from a low income to a middle income economy Fast forward to 2010 and Thailand had climbed yet another rung in the development ladder to become according to World Bank criteria an upper middle income economy Throughout this period of economic and social transformation contrary to historical experience and theoretical models one thing has remained constant the central role of Thai smallholder farming This conundrum the persistence of the smallholder in a time of extraordinary change lies at the heart of this book In *More than Rural* author Jonathan Rigg explores how people in the countryside have adapted to their changing world the new opportunities available and the consequences for rural life and living The Thai government has successfully developed the countryside but with unexpected results New household forms have emerged women have become mobile in a manner few expected and relations between rural and urban have changed Yet the smallholder has persisted and Rigg's attempts to understand why offer a fresh perspective on Thailand's development Setting aside the urban industrial point of view that we so often privilege Rigg asks different questions about Thailand's development What if he wonders the present changes are not simply way stations transitions to the main act of urbanization What if they represent a new form of rural livelihood Rigg's thoughtful nuanced approach to agrarian change viewing the countryside as more than agriculture the rural as more than the countryside and rural people as more than farmers offers insights into Thailand's wider transformations class identities intergenerational relations its political impasse and more Based on over three and a half decades of fieldwork in seventeen villages across three regions and encompassing more than one thousand households and a deep knowledge of primary and published sources *More than Rural* is a significant work with implications for contemporary development across Asia and the global South
