China Confronts Climate Change Perspective:

China Confronts Climate Change Peter H. Koehn, 2015-12-14 China is an integral actor in any movement that will stabilize the global climate at conditions suited to sustainable development for its own population and for people living around the world. Assessments of China's climatic system consequences impact and responsibilities need to take into account the strengths, weaknesses, and potential of subnational governments, non-governmental organizations, transnational non-state connections, and the urban populace in reducing greenhouse gas emissions. A multitude of recent local initiatives that have engaged subnational China in actions that mitigate emissions can be enhanced by powerful framings that appeal to citizen concerns about air pollution and health conditions. *China Confronts Climate Change* offers the first fully comprehensive account of China's response to climate change based on engagement with the global climate governance literature and current debates over responsibility along with specific insights into the Chinese context. Responsible implementation of any overarching climate agreement depends on expanding China's subnational contributions. To remain fully informed about GHG emissions mitigation, China watchers and climate change monitors need to pay close attention to bottom-up developments. The book provides a valuable contemporary resource for students, scholars, and policy leaders at all levels of governance who are concerned with climate change, environmental politics, and sustainable urban development. **Toward a Public**

Theology of Climate Change Bryan Mok, 2025-10-20 How can theology shape public discourse on climate change? This book explores the urgent intersection of climate justice, public theology, and environmental communication from a Chinese Christian perspective. As the world grapples with climate apocalypse, this study reveals how religious discourse can influence public opinion and policymaking. Engaging with global and Chinese contexts, it evaluates competing theological approaches and proposes a framework for a public theology of climate change. With insights into environmental activism, political deliberation, and ethical responsibility, this book equips theologians, religious scholars, and climate activists to rethink the role of religion in the fight against climate change. **Climate Change Law in China in Global Context** Xiangbai He, Hao

Zhang, Alexander Zahar, 2020-05-31 In *Climate Change Law in China in Global Context*, seven climate change law scholars explain how the country's legal system is gradually being mobilized to support the reduction of greenhouse gas emissions in China and achieve adaptation to climate change. There has been little English scholarship on the legal regime for climate change in China. This volume addresses this gap in the literature and focuses on recent attempts by the country to build defences against the impacts of climate change and to meet the country's international obligations on mitigation. The authors are not only interested in China's laws on paper; rather, the book explains how these laws are implemented and integrated in practice and sheds light on China's current laws, laws in preparation, the changing standing of law relative to policy, and the further reforms that will be necessary in response to the 2015 Paris Agreement on Climate Change. This comprehensive and critical account of the Chinese legal system's response to the pressures of climate change will be an important resource for

scholars of international law environmental law and Chinese law Handbook on Climate Change Vulnerability. Environments and Communities Fiona Miller, Krishna K. Shrestha, Sarah Wright, 2025-10-07 This thought provoking Handbook explores the spatially and socially differentiated nature of climate change vulnerability Expert authors discuss the ways that climate change vulnerability is materially and discursively produced as well as the agency capacity and resilience of affected communities This title contains one or more Open Access chapters *China's Climate-Energy Policy* Akihisa Mori, 2018-07-04 China's recent climate energy policy an outcome of contemporary challenges has generated conflict of interest amongst major stakeholders Coupled with a boost in demand for oil gas and coal as well as a rapid growth in wind and solar power it has not only affected domestic fossil fuel and renewable energy providers but has also provoked a resource boom affecting development pathways internationally This book therefore seeks to examine the economic social and ecological effects associated with China's climate energy policy Assessing how the policy has been and will be formulated and implemented it analyses the changing use of energy CO2 emissions and GDP as well as social and environmental impacts both domestically and internationally It presents in depth case studies on specific policies in China and on its resource exporting countries such as Indonesia Australia Myanmar and Mongolia At the same time using quantitative data it provides detailed input output and applied computable general equilibrium analyses Arguing that China has actively advanced its climate energy policy to become a leader of global climate governance it demonstrates that China ultimately relocates the cost of its climate energy policy to resource exporting countries This book will be of great interest to students and scholars of energy the environment and sustainability as well as Chinese Studies and economics **Climate Change Governance in Asia** Kuei-Tien Chou, Koichi Hasegawa, Dowan Ku, Shu-Fen Kao, 2020-07-19 Asian countries are among the largest contributors to climate change China India Japan and South Korea are among the top ten largest carbon emitters in the world with South Korea Japan and Taiwan also some of the largest on a per capita basis At the same time many Asian countries notably India Taiwan Japan the Philippines and Thailand are among those most affected by climate change in terms of economic losses attributed to climate related disasters Asia is an extremely diverse region in terms of the political regimes of its constituent countries and of their level of development and the nature of their civil societies As such its countries are producing a wide range of governance approaches to climate change Covering the diversity of climate change governance in Asia this book presents cosmopolitan governance from the perspective of urban and rural communities local and central governments state society relations and international relations In doing so it offers both a valuable overview of individual Asian countries approaches to climate change governance and a series of case studies for finding solutions to climate change challenges *China's Low-Carbon Energy Relations with Emerging Markets* Ryan McLean, 2025-09-30 This book explores China's contemporary energy relations with emerging markets Through the prisms of global low carbon transition and power sector development Ryan McLean utilises the multi level perspective to build upon existing understandings of the Chinese

renewables revolution from a top down interpretation McLean presents an in depth analysis of the external ramifications of China's solar and wind dominance across the Global South in the areas of green technological trade project construction and regime financing This research provides a convincing explanation for why Chinese coal incumbents have been proactive overseas in spite of the country's clean energy dominance and Beijing's climate commitments Finally the book argues that China's low carbon prowess has longer term significance for the Global South and in addition contributes to the rising debates over the geopolitics of renewable transition in a complex multipolar world This volume will be of great interest to students and scholars of Chinese energy policy and foreign relations energy markets in the Global South international politics and the wider global energy transition field *Climate Change and the Future of Democracy* R. S. Deese, 2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons

Reimagining Climate Change Paul Wapner, Hilal Elver, 2016-02-05 Responding to climate change has become an industry Governments corporations activist groups and others now devote billions of dollars to mitigation and adaptation and their efforts represent one of the most significant policy measures ever dedicated to a global challenge Despite its laudatory intent the response industry or Climate Inc is failing Reimagining Climate Change questions established categories routines and practices that presently constitute accepted solutions to tackling climate change and offers alternative routes forward It does so by unleashing the political imagination The chapters grasp the larger arc of collective experience interpret its meaning for the choices we face and creatively visualize alternative trajectories that can help us cognitively and emotionally enter into alternative climate futures They probe the meaning and effectiveness of climate protection from below forms of community and practice that are emerging in various locales around the world and that hold promise for greater collective resonance They also question climate protection from above in the form of industrial and modernist orientations and examine large scale agribusinesses as well as criticize the concept of resilience as it is presently being promoted as a response to climate change This book will be of great interest to students and scholars of climate change global environmental politics and environmental studies in general as well as climate change activists **The Palgrave Handbook of Local**

Governance in Contemporary China Jianxing Yu, Sujian Guo, 2019-01-07 This Handbook provides a comprehensive overview of local governance in China and offers original analysis of key factors underpinning trends in this field drawing on the expertise of scholars both inside and outside China It explores and analyzes the dynamic interaction and collaboration among multiple governmental and non governmental actors and social sectors with an interest in the conduct of public affairs

to address horizontal challenges faced by the local government society economy and civil community and considers key issues such as governance in urban and rural areas the impact of technology on governance and related issues of education healthcare environment and energy As the result of a global and interdisciplinary collaboration of leading experts this Handbook offers a cutting edge insight into the characteristics challenges and trends of local governance and emphasizes the promotion of good governance and democratic development in China
