Dayton® Portable Submersible Utility Pumps

Description

This submersible utility pump operates manually and is intended for numerous applications, including draining of flooded basements, dewatering construction sites, and excavations. The unit operates efficiently on a 115V, 60 Hz., single phase, permanent split capacitor motor that includes a 10 feet long, 18 gauge, 3-prong power cord. The motor is maintenance-free. Neither the motor nor ball bearings require further lubrication. Additionally, the motor is protected from overheating and damage. It automatically shuts off with sudden rises in temperature and restarts after cooling down.

The pump is made from high-quality, durable materials, including: aluminum alloy for the motor casing and thermal plastic for the pump housing; stainless steel hardware and shaft; ceramic for shaft sleeve; Buna-N for lip seal; and a non-clog plastic composite impeller.
