Wine Wars Mike Veseth, 2011-06-16 Writing with wit and verve Mike Veseth a k a the Wine Economist tells the compelling story of the war between the market trends that are redrawing the world wine map and the terroirists who resist them Wine and the wine business are at a critical crossroad today transformed by three powerful forces Veseth begins with the first force globalization which is shifting the center of the wine world as global wine markets provide enthusiasts with a rich but overwhelming array of choices Two Buck Chuck the second force symbolizes the rise of branded products like the famous Charles Shaw wines sold in Trader Joe s stores Branded corporate wines simplify the worldwide wine market and give buyers the confidence they need to make choices but they also threaten to dumb down wine sacrificing terroir to achieve marketable McWine reliability Will globalization and Two Buck Chuck destroy the essence of wine Perhaps but not without a fight Veseth argues He counts on the revenge of the terroirists to save wine s soul But it won t be easy as wine expands to exotic new markets such as China and the very idea of terroir is attacked by both critics and global climate change Veseth

vacuum at the heart of our communities and societies and many discretionary products have simply become too expensive for people to buy on a regular basis. There is now an urgent need to regenerate our local shopping areas so how can retailers and brands respond to this crisis? Fortunately new shoots of recovery are emerging from the wreckage of the old order: new brands, new ways of providing value and new and innovative methods of creating interest to draw in consumers, all of which have the potential to kick start the retail economy. Retail Recovery offers a comprehensive analysis of these new forces that are changing the way in which we browse for and buy products and how we experience and engage with the brands themselves. It includes in-depth interviews with some of the most innovative players in the UK, Europe and North America in the hope of drawing out key learning points for the rest of the industry. It also provides essential guidelines for governments as they strive to rebuild and reinforce the retail spaces within our communities, allowing them to create a more effective economic lifeline for retailers, shoppers, retail workers, manufacturers and distributors.

Value Creation Principles Bartley J. Madden, 2020-06-23

PRAISE FOR VALUE CREATION PRINCIPLES In *Value Creation Principles* Madden introduces the Pragmatic Theory of the Firm that positions the firm as a system fueled by human capital innovation and at a deeper level imagination. He challenges us to understand how we know what we think we know in order to better discover faulty assumptions that often are camouflaged by language. His knowledge building loop offers guideposts to design experiments and organize feedback to facilitate early adaptation to a changed environment and to avoid being mired in ways of thinking rooted in knowledge of what worked well in the past, a context far different from the context of today. His book explains a way of being that enables those who work for or invest in business firms to see beyond accounting silos and short-term quarterly earnings and to focus on capabilities instrumental for creating long-term future and sustainable value for the firm's stakeholders. I can't recommend this astounding book enough, especially given its deep and timely insights for our world today. John Seely Brown, former Chief Scientist for Xerox Corp and Director of its Palo Alto Research Center (PARC), co-author with Ann Pendleton Jullian of *Design Unbound: Designing for Emergence in a White Water World*. In contrast to existing abstract theories of the firm, Madden's pragmatic theory of the firm connects management's decisions in a practical way to a firm's life cycle and market valuation. The book promotes a firm's knowledge building proficiency relative to competitors as the fundamental driver of a firm's long-term performance, which leads to insights about organizational capabilities, intangible assets and excess shareholder returns. *Value Creation Principles* is ideally suited to facilitate progress in the New Economy by opening up the process by which firms build knowledge and create value, which is a needed step in revising how neoclassical economics treats the firm. Tyler Cowen, Professor of Economics, George Mason University, co-author of the popular economics blog *Marginal Revolution*. Bartley Madden rightfully points out that both textbook and more advanced economic theories of the firm fail to address the concerns of top management and boards of directors. He offers a tantalizing pragmatic alternative that directly connects to quantitative changes in the firm's market value. His framework gives

recognition to the importance of intangible assets and his pragmatic approach is quite complementary to the Dynamic Capabilities framework that strategic managers implicitly and sometimes explicitly employ David J Teece Thomas W Tusher Professor in Global Business Faculty Director Tusher Center for the Management of Intellectual Capital Haas School of Business University of California Berkeley
