Corticonics Corticonics:

Corticonics M. Abeles,1991-02-22 Understanding how the brain works is probably the greatest scientific and intellectual challenge of our generation The cerebral cortex is the instrument by which we carry the most complex mental functions Fortunately there exists an immense body of knowledge concerning both cortical structure and the properties of single neurons in the cortex With the advent of the supercomputer there has been increased interest in neural network modeling What is needed is a new approach to an understanding of the mammalian cerebral cortex that will provide a link between the physiological description and the computer model This book meets that need by combining anatomy physiology and modeling to achieve a quantitative description of cortical function The material is presented didactically starting with descriptive anatomy and comprehensively examining all aspects of modeling The book gradually leads the reader from the macroscopic cortical anatomy and standard electrophysiological properties of single neurons to neural network models and synfire chains The most modern trends in neural network modeling are explored

Neural Networks: From Biology To High Energy Physics - Proceedings Of The 2nd Workshop Omar Benhar,Paolo Del Giudice,Carlo Bosio,M Grandolfo,1993-10-16 Neural network models in addition to being of intrinsic theoretical interest have also proved to be a useful framework in which issues in theoretical biology can be put into perspective These issues include amongst others modelling the activity of the cortex and the study of protein folding More recently neural network models have been extensively investigated as tools

for data analysis in high energy physics experiments These workshop proceedings reflect the strongly interdisciplinary character of the field and provide an updated overview of recent developments Current Catalog National Library of Medicine (U.S.),1992 First multi year cumulation covers six years 1965 70 Network ,2007 *Critical Technologies for the Future of Computing* Sunny Bains,Leo J.
