Excavations at the Cappadocia Gate

Geoffrey D. Summers,2021-04-30 The city on the Kerkenes Dag in the high plateau of central Turkey was a new Iron Age capital very probably Pteria Founded in the later seventh century BC the city was put to the torch in the mid sixth century and then abandoned Between 1999 and 2011 what we have called the Cappadocia Gate one of the seven city gates that pierce the 7 km of strong stone defenses was excavated in its entirety This volume documents as fully as possible the results of those excavations The location of the gate and its architecture are discussed and illustrated with a chapter devoted to its partial restoration Cultic installations within the gate structure include a built stepped monument with semi iconic idol an aniconic stela and graffiti representing similar stones Sculpture set up at the back of the gate comprised many fragments of a life sized statue supported by a plinth bearing adorsed sphinxes carved in relief The remains of two human victims of the destruction are examined as are animal bones that perhaps provide evidence of meals consumed by builders of the gate Pottery and other finds including well preserved iron door bands are presented as is an exceptional ornament of gold and electrum A final chapter attempts to place these remarkable discoveries in a wider context The gate plan and the cultic installations and sculpture set up inside the gate appear to be entirely Phrygian Combined with evidence of Paleo Phrygian inscription and graffiti already published OIP 135 this volume sheds dramatic new and unexpected evidence for the power wealth and sophistication of an eastward expansion of Phrygia The brief existence hardly more than 100 years together with the excellent stratigraphic context of the destruction level provide an unparalleled window onto the first half of the sixth century BC on the Anatolian Plateau Power Farming in Australia and New Zealand Technical Manual ,1966 **The Farmer & Stock-breeder** ,1953
