TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Language and Computers Geoff Barnbrook, 1996. This book is the first introduction to the practical problems and benefits of corpus based language research. It provides the basic tool kit for anyone approaching corpus based research for the first time from a variety of disciplines.

Linguistics, Computers, and the Language Teacher John Harvey Underwood, 1984.

Language and computers Lelia Glass, Markus Dickinson, Chris Brew, Detmar Meurers, 2024-08-19. This book offers an accessible introduction to the ways that language is processed and produced by computers, a field that has recently exploded in interest. The book covers writing systems, tools to help people write, computer assisted language learning, the multidisciplinary study of text as data, text classification, information retrieval, machine translation and dialog. Throughout we emphasize insights from linguistics along with the ethical and social consequences of emerging technology. This book welcomes students from diverse intellectual backgrounds to learn new technical tools and to appreciate rich language data, thus widening the bridge between linguistics and computer science.
