Accelerations and Circular Motion

Newton's second law, and PWS, tells us that net force and its corresponding acceleration are always in the same direction. (Only force-related accelerations are vector quantities.) But force and acceleration are not always in the direction of velocity (another vector).

1. You're in a car at a traffic light. The light turns green and the driver "rips on the gas."

- Your body lurches forward (not at all backward).
- The car accelerates forward (not at all backward).
- The force on the car acts forward (not at all backward).

The sketch shows the top view of the car. Note the directions of the velocity and acceleration vectors.

2. You're driving along and approach a stop sign. The driver rips on the brakes.

- Your body lurches backward (not at all forward).
- The car accelerates backward (not at all forward).
- The force on the car acts backward (not at all forward).

The sketch shows the top view of the car. Draw vectors for velocity and acceleration.

3. You continue driving, and round a sharp curve to the left at constant speed.

- Your body lurches backward (not at all forward).
- The direction of the car's acceleration is backward (not at all forward).
- The force on the car acts backward (not at all forward).

Draw vectors for velocity and acceleration of the car.

4. In general, the directions of lurch and acceleration, and therefore the directions of force and force, are the same (not related) opposite.

- The whirling stone's direction of motion keeps changing.
 - If it moves faster, its direction changes faster (slower).
 - This indicates that as speed increases, acceleration increases (decreases) (stays the same).
- Consider whirling the stone on a shorter string—that is, of smaller radius.
 - For a given speed, the rate that the stone changes direction is less faster (slower).
 - This indicates that as the radius decreases, acceleration decreases (increases) (stays the same).

Kieso, 2007-12-04 Now readers can get all the accuracy and authority of the best selling intermediate accounting book in the new second edition of this brief streamlined version *Fundamentals of Intermediate Accounting* presents a balanced discussion of concepts and applications explaining the rationale behind business transactions before addressing the accounting and reporting for those activities Readers will gain a solid foundation in such areas as the standard setting process the three major financial statements revenue recognition income taxes reporting disclosure issues and much more *SRA Mathematics*, 1977 *Concept Mapping* Pamela McHugh Schuster, 2020-01-06 Looking for an easier path to care planning Create a map Concept mapping is a clear visual and systematic model for gathering and categorizing relevant assessment data identifying patient problems and developing patient goals interventions and outcomes for each nursing diagnosis A concept map is your guide to nursing care in any clinical setting **Event Planning and Management** Ruth Dowson, Bernadette Albert, Dan Lomax, 2022-12-03 Learn how to plan deliver and evaluate successful events with this clear and comprehensive textbook which explores the latest developments in this challenging and fast paced environment Written by authors with extensive industry experience of working on a wide spectrum of events this is an essential step by step resource for students and the next generation of event planners Offering a well rounded approach which introduces key models and theories as well as practical real life insights throughout *Event Planning and Management* offers a structured formula for all types of events from their initial planning to final evaluation Without assuming prior subject knowledge or experience this fully updated third edition of *Event Planning and Management* provides a renewed focus on virtual and hybrid events which is lacking from many other texts Featuring real world examples including The 2022 Commonwealth Games Expo 2020 Dubai and The American Heart Association AHA conferences accompanying online resources include lecture slides activities self test questions and web links This is an indispensable resource for students studying events related modules as well as early stage practitioners and aspiring events managers *Writing on the Wall* Philip Van Notten, 2005 Although the significance of 9 11 is subject to debate it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events Recent catalysts of this sentiment are eye catching developments such as the SARS Severe Acute Respiratory Syndrome and bird flu outbreaks the Enron and Parmalat scandals political assassinations in Sweden and the Netherlands regime changes in Iraq and Afghanistan and terrorist attacks in Bali Istanbul Madrid and various parts of the Middle East However recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before Looking back in history we see that disruptive processes are common For example 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent the collapse of communism Berlin as the capital of a reunited Germany the wars in the former Yugoslavia the single European currency and the near doubling of the number of European Union member

states Changes elsewhere have been no less discontinuous and unforeseen the fall of the Asian tigers the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela Societal discontinuity is a relatively new area of concern in policy development Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting which tended to reason from continuous developments and linear processes Rather than making forecasting the future it has become popular to use scenarios as a manner to consider several possible futures Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past present and future developments which can serve as a basis for action Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments
