Caring For Veterans With Deployment Related Stress Disorders Iraq Afghanistan And Beyond:

Caring for Veterans with Deployment-related Stress Disorders Josef I. Ruzek, 2011 The chapters in this book summarize current scientific and clinical knowledge about psychological trauma PTSD and related posttraumatic stress reactions among military veterans and civilians deployed to Operation Enduring Freedom OEF in Afghanistan and Operation Iraqi Freedom OIF Although the content is focused on individuals serving in Iraq and Afghanistan the book also offers a framework to help those not only in the United States but elsewhere around the world who will be directly affected by future wars This book is designed to support clinical practice by providing clinicians with solid evidence based information To that end the chapters include clinical case illustrations intended to help practitioners integrate the material with real world scenarios The book should also stimulate research by providing a comprehensive summary of the existing literature We anticipate that it may function as a practical tool for clinicians interested in trauma work and as a textbook for use in instructional settings A comprehensive approach to the management of posttraumatic stress reactions must encompass both prevention and treatment It must also incorporate both clinical and public health perspectives Problems experienced by individuals affect the larger community so care at the individual level should be offered within the context of a larger system of services Thus this book comprises five major parts epidemiology and course of problems assessment of trauma PTSD related mental health outcomes including the context of co occurring traumatic brain injury and suicidal states specific noncombat stressors and problems and their ramifications prevention and treatment of PTSD and public health challenges related to barriers to care and integration of service delivery systems Introduction PsycINFO Database Record c 2010 APA all rights reserved

The Oxford Handbook of Traumatic Stress

Disorders J. Gayle Beck, Denise M. Sloan, 2012-02-24 The experience of traumatic events is a near universal albeit unfortunate part of the human experience Given how many individuals are exposed to trauma it is interesting to question why some individuals are resilient in the face of trauma while others go on to develop chronic post traumatic stress Throughout the relatively brief history of the psychological study of trauma a number of themes have consistently emerged many of these themes remain essential elements within our current study of traumatic stress disorders as summarized within this volume The Oxford Handbook of Traumatic Stress Disorders addresses the current landscape of research and clinical knowledge

surrounding traumatic stress disorders Bringing together a group of highly regarded experts this volume is divided into six sections together summarizing the current state of knowledge about 1 classification and phenomenology 2 epidemiology and special populations 3 contributions from theory 4 assessment 5 prevention and early intervention efforts and 6 treatment of individuals with post trauma mental health symptoms Throughout the volume attention is paid to identifying current controversies in the literature and highlighting directions that hold promise for future work

Preventing Psychological Disorders in Service Members and Their Families Institute of Medicine, Board on the Health of Select Populations, Committee on the Assessment of Resiliency and Prevention Programs for Mental and Behavioral Health in Service Members and Their Families, 2014-02-11 Being deployed to a war zone can result in numerous adverse psychological health conditions It is well documented in the literature that there are high rates of psychological disorders among military personnel serving in Operation Enduring Freedom in Afghanistan and Operation Iraqi Freedom in Iraq as well as among the service members families For service members families the degree of hardship and negative consequences rises with the amount of the service members exposure to traumatic or life altering experiences Adult and child members of the families of service members who experience wartime deployments have been found to be at increased risk for symptoms of psychological disorders and to be more likely to use mental health services In an effort to provide early recognition and early intervention that meet the psychological health needs of service members and their families DOD currently screens for many of these conditions at numerous points during the military life cycle and it is implementing structural interventions that support the improved integration of military line personnel non medical caregivers and clinicians such as RESPECT Mil Re engineering Systems of Primary Care Treatment in the Military embedded mental health providers and the Patient Centered Medical Home Preventing Psychological Disorders in Service Members and Their Families evaluates risk and protective factors in military and family populations and suggests that prevention strategies are needed at multiple levels individual interpersonal institutional community and societal in order to address the influence that these factors have on psychological health This report reviews and critiques reintegration programs and prevention strategies for PTSD depression recovery support and prevention of substance abuse suicide and interpersonal violence

Handbook of Military and Veteran Suicide Bruce Bongar, Glenn Sullivan, Larry James, 2017-03-30 Handbook of Military and Veteran Suicide reviews the most advanced scientific understanding of the phenomenon of active duty and veteran suicide while providing a useful hands on clinical guide for those working with this population

The Oxford Handbook of Behavioral Emergencies and Crises Phillip M. Kleespies, 2016-09-19 The Oxford Handbook of Behavioral Emergencies and Crises includes the most up to date and valuable research on the evaluation and management of the most challenging patients or clients faced by mental health providers individuals who are at high risk of suicide of other directed violence or of becoming the victims of interpersonal violence These are cases in which the outcome can be serious injury or death and there can be negative consequences not only for the

patient but also for the patient's family and friends for the assessing or treating clinician and for the patient's clinic or medical center. Virtually all mental health clinicians with an active caseload will see individuals with such issues. This Handbook is comprised of chapters by leading clinicians, researchers, and scholars in this area of practice. It presents a framework for learning the skills needed for assessing and working competently with such high-risk individuals. Chapters draw a distinction between behavioral emergencies and crises and between emergency intervention and crisis intervention. The book examines the interrelated aspects of the major behavioral emergencies that is, for example, the degree to which interpersonal victimization may lead an individual on a pathway to later suicidal or violent behavior or the degree to which suicidal individuals and violent individuals may share certain cognitive characteristics. This resource is not simply a knowledge base for behavioral emergencies; it also presents a method for reducing stress and acquiring skills in working with high-risk people.

Dissemination and Implementation of Evidence-Based Psychological Interventions R. Kathryn McHugh, David H. Barlow, 2012-04-17 The lack of widely available effective mental health care presents a major public health problem. This volume describes the rapidly expanding area of dissemination and implementation of evidence-based psychological interventions. Leading efforts internationally to improve access to effective care are highlighted by the leaders of these programs.

Handbook of PTSD, Second Edition Matthew J. Friedman, Terence M. Keane, Patricia A. Resick, 2015-10-20 Widely regarded as the definitive reference, this handbook brings together foremost authorities on posttraumatic stress disorder (PTSD). Diagnostic, conceptual, and treatment issues are reviewed in depth. The volume examines the causes and mechanisms of PTSD on multiple levels, from psychological processes to genes and neurobiology. Risk and resilience processes are addressed across development and in specific populations. Contributors describe evidence-based assessment and treatment approaches as well as promising emerging interventions. The integrative concluding chapter identifies key unanswered questions with important implications for science and practice. New to This Edition: Reflects major research advances and the new diagnostic criteria in DSM-5. Chapters on the dissociative subtype of PTSD, child assessment, couple and family therapies, and group treatments. Chapters on research methods, Internet-based interventions, telemental health, and implementation of best practices. Many new authors and extensively revised chapters.

Military Psychologists' Desk Reference Bret A. Moore, Jeffrey E. Barnett, 2014-04-01 The psychological well-being of servicemen and women returning from war is one of the most discussed and contemplated mental health issues today. Media programs debate the epidemic of PTSD in returning veterans and the potential fallout of a less than adequate veteran mental health system. This public discussion is only a small glimpse into the field of military psychology. One of the most diverse specialties within psychology, it is a sector positioned and equipped to influence such concepts as psychological resilience, consequences of extended family stress, the role of technology in mental healthcare delivery, and how to increase human performance under harsh conditions. Military Psychologists Desk Reference is the authoritative guide in the field of military mental health.
