58PAV High-Efficiency Induced-Combustion Upflow Furnace

Input Capacities:
45,000 thru 155,000 Btuh

80% AFUE At Budget Price

Carrier provides an 80% Annual Fuel Utilization Efficiency (AFUE) gas furnace for the budget conscious consumer and builder. The 58PAV offers the same high quality you demand and receive from Carrier.

The cabinet is constructed from a specially selected galvanized embossed steel with a clear coating which provides protection from humidity and rust.

The 58PAV offers a hot surface ignition system which provides a superior and more reliable ignition system than older spark relight systems.

The heat exchangers are constructed of aluminized steel and covered by a 10-year Limited Warranty. They are Carrier's patented Super-S heat exchangers that improve heat transfer and enables downsizing of this furnace to only 40 in. tall.

To improve the sound level, we have incorporated a soft mount inducer assembly and a slow opening gas valve.

The control board is the brain of this induced-combustion gas furnace. It offers a unique self-test feature that checks all the major functions of the furnace within 1 minute. The control board also features a 3-amp fuse that protects the transformer and control board. Another feature on the control board is a LED status indicator light to ensure top furnace performance.
