Risk Conundrums Roger E Kasperson, 2017-07-14 A risk conundrum can be viewed as a risk that poses major issues in assessment and whose management is not easily engaged Such perplexing problems can either paralyze or badly delay risk analysis and directions for progression Rather than simply focusing on the progress in risk analysis that has already been made it is crucial to consider what has been learnt about these seemingly unmanageable problems and how best to move forward Risk Conundrums seeks to answer this question by bringing together a range of key thinkers in the field to explore key issues such as risk communication uncertainty social trust indicators and metrics and risk management drawing upon case study examples including natural disasters terrorism and energy transitions The initial chapters address risk conundrums their properties and the challenges they pose The book then turns to a greater emphasis on systemic and regional risk conundrums Finally it considers how risk management can be changed to address these unsolvable conundrums Alternative pathways are defined and scrutinized and predictions for future developments set out This book will be of great interest to students and scholars of risk governance environmental policy and sustainable development

anthropologists sociologists environmental historians and others working in and around political ecology Development, Security, and Aid Jamey Essex,2013-03-01 In *Development Security and Aid* Jamey Essex offers a sophisticated study of the U S Agency for International Development USAID examining the separate but intertwined discourses of geopolitics and geoeconomics Geopolitics concentrates on territory borders and strategic political and military positioning within the international state system Geoeconomics emphasizes economic power growth and connectedness within a global and supposedly borderless system Both discourses have strongly influenced the strategies of USAID and the views of American policy makers bureaucrats and business leaders toward international development Providing a unique geographical analysis of American development policy Essex details USAID s establishment in 1961 and traces the agency s growth from the Cold War into an era of neoliberal globalization up to and beyond 9 11 the global war on terror and the looming age of austerity USAID promotes improvement for millions by providing emergency assistance and support for long term economic and social development Yet the agency s humanitarian efforts are strongly influenced and often trumped by its mandate to advance American foreign policies As a site of a strategy for and an agent in the making of geopolitics and geoeconomics USAID Essex argues has often struggled to reconcile its many institutional mandates and objectives The agency has always occupied a precarious political position one that is increasingly marked by the strong influence of military corporate and foreign policy institutions in American development strategy **Africa's Green Revolution** William G. Moseley,Matthew A.

Schnurr,Rachel Bezner-Kerr,2017-10-02 This volume examines the dominant neoliberal agenda for agricultural development and hunger alleviation in Africa The text reviews the history of African agricultural and food security policy in the post colonial period across a range of geographical contexts in order to contextualise the productionist approach embedded in the much heralded New Green Revolution for Africa This strategy supported by a range of international agencies promotes the use of hybrid seeds fertilisers and pesticides to boost crop production This approach is underpinned by a new and unprecedented level of public private partnerships as donors actively work to promote the private sector and build links between African farmers input suppliers agro dealers agro processors and retailers On the consumer end increased supermarket penetration into poorer neighbourhoods is proffered as a solution to urban food insecurity The chapters in this volume complicate understandings of this new approach and raise serious questions about its effectiveness as a strategy for increasing food production and alleviating poverty across the continent This book is based on a special issue of *African Geographical Review* **Soundscapes of Wellbeing in Popular Music** Gavin J. Andrews,Paul Kingsbury,Robin

Kearns,2016-04-01 Unearthing the messy and sprawling interrelationships of place wellbeing and popular music this book explores musical soundscapes of health ranging from activism to international charity to therapeutic treatments and how wellbeing is sought and attained in contexts of music Drawing on critical social theories of the production circulation and consumption of popular music the book gathers together diverse insights from geographers and musicologists Popular music

has become increasingly embedded in complex and often contradictory discourses of wellbeing. For instance, some new genres and sub cultures of popular music are associated with violence, drug use and the angst of living yet simultaneously define the hopes and dreams of millions of young people. At a service level, popular music is increasingly used as a therapeutic modality in holistic medicine as well as in conventional health care and public health practice. The genre of popular music then is fundamental to human wellbeing as an active and central part of people's emotional lives. By conceptually and empirically foregrounding place, this book demonstrates how music, whether from particular places, about particular places or played in particular places, is a crucial component of health and wellbeing. Allies or Adversaries Jennifer N.

Brass, 2016-08-18 Governments throughout the developing world have witnessed a proliferation of non-governmental non-profit organizations (NGOs) providing services like education, healthcare and piped drinking water in their territory. In *Allies or Adversaries* Jennifer N. Brass explains how these NGOs have changed the nature of service provision, governance and state development in the early twenty-first century. Analyzing original surveys alongside interviews with public officials, NGOs and citizens, Brass traces street-level government, NGO and state-society relations in rural, town and city settings of Kenya. She examines several case studies of NGOs within Africa in order to demonstrate how the boundary between purely state and non-state actors blurs, resulting in a very slow turn toward more accountable and democratic public service administration. Ideal for scholars, international development practitioners and students interested in global or international affairs, this detailed analysis provides rich data about NGO-government and citizen-state interactions in an accessible and original manner.
