Democratizing Inequalities Dilemmas Of The New Public Participation:

Democratizing Inequalities Caroline W. Lee, 2015-01-30 Opportunities to have your say get involved and join the conversation are everywhere in public life From crowdsourcing and town hall meetings to government experiments with social media participatory politics increasingly seem like a revolutionary antidote to the decline of civic engagement and the thinning of the contemporary public sphere Many argue that with new technologies flexible organizational cultures and a supportive policymaking context we now hold the keys to large scale democratic revitalization Democratizing Inequalities shows that the equation may not be so simple Modern societies face a variety of structural problems that limit potentials for true democratization as well as vast inequalities in political action and voice that are not easily resolved by participatory solutions Popular participation may even reinforce elite power in unexpected ways Resisting an oversimplified account of participation as empowerment this collection of essays brings together a diverse range of leading scholars to reveal surprising insights into how dilemmas of the new public participation play out in politics and organizations Through investigations including fights over the authenticity of business sponsored public participation the surge of the Tea Party the role of corporations in electoral campaigns and participatory budgeting practices in Brazil Democratizing Inequalities seeks to refresh our understanding of public participation and trace the reshaping of authority in today's political environment

The Professionalization of Public Participation Laurence Bherer, Mario Gauthier, Louis Simard, 2017-03-27 The Professionalization of Public Participation is an edited collection of essays by leading and emerging scholars examining the emerging profession of public participation professionals Public participation professionals are persons working in the public private or third sectors that are paid to design implement and or facilitate participatory forums The rapid growth and proliferation of participatory arrangements call for expertise in the organizing of public participation The contributors analyze the professionalization of this practice in different countries United States France Canada Italy and the United Kingdom to see how their actions challenge the development of participatory arrangements Designing such processes is a delicate activity since it may affect not only the quality of the processes and their legitimacy but also their capacity to influence decision making

The Participation Paradox Luke Sinwell, 2023-02-15 The last two decades have ushered in what has become known as a participatory revolution with consultants advisors and non profits called into communities classrooms and corporations alike to listen to ordinary people With exclusively bureaucratic approaches no longer en vogue authorities now opt for open forums for engagement In The Participation Paradox Luke Sinwell argues that amplifying the voices of the poor and dispossessed is often a quick fix incapable of delivering concrete and lasting change The ideology of public consultation and grassroots democracy can be a smokescreen for a cost effective means by which to implement top down decisions As participation has become mainstreamed by governments around the world so have its radical roots become tamed by neoliberal forces that reinforce existing relationships of power Drawing from oral testimonies and

ethnographic research Sinwell presents a case study of one of the poorest and most defiant Black informal settlements in Johannesburg South Africa Thembelihle which consists of more than twenty thousand residents highlighting the promises and pitfalls of participatory approaches to development Providing a critical lens for understanding grassroots democracy The Participation Paradox foregrounds alternatives capable of reclaiming participation s emancipatory potential *The Participatory Democracy Turn* Laurence Bherer,Pascale Dufour,Francoise Montambeault,2018-12-07 Since the 1960s participatory discourses and techniques have been at the core of decision making processes in a variety of sectors around the world a phenomenon often referred to as the participatory turn Over the years this participatory turn has given birth to a large array of heterogeneous participatory practices developed by a wide variety of organizations and groups as well as by governments Among the best known practices of citizen participation are participatory budgeting citizen councils public consultations etc However these experiences are sometimes far from the original 1960s radical conception of participatory democracy which had a transformative dimension and aimed to overcome unequal relationships between the state and society and emancipate and empower citizens in their daily lives This book addresses four sets of questions what do participatory practices mean today what does it mean to participate for participants from the perspective of citizenship building how the processes created by the participatory turn have affected the way political representation functions and does the participatory turn also mean changing relationships and dynamics among civil servants political representatives and citizens Overall the contributions in this book illustrate and grasp the complexity of the so called participatory turn It shows that the participatory turn now includes several participatory democracy projects which have different effects on the overall system depending on the principles that they advocate This book was originally published as a special issue of the Journal of Civil Society

Subsistence Agriculture in the US Ashley Colby,2020-09-24 Focusing on ethnography and interviews with subsistence food producers this book explores the resilience innovation and creativity taking place in subsistence agriculture in America To date researchers interested in alternative food networks have often overlooked the somewhat hidden unorganized population of household food producers Subsistence Agriculture in the US fills this gap in the existing literature by examining the lived experiences of people taking part in subsistence food production Over the course of the book Colby draws on accounts from a broad and diverse network of people who are hunting fishing gardening keeping livestock and gathering and looks in depth at the way in which these practical actions have transformed their relationship to labor and land She also explores the broader implications of this pro environmental activity for social change and sustainable futures With a combination of rigorous academic investigation and engagement with pressing social issues this book will be of great interest to scholars of sustainable consumption environmental sociology and social movements

Public Deliberation on Climate Change Lorelei L. Hanson, 2018-02-05 There exists in both academic and political circles a growing interest in public deliberation as an alternative to the sometimes adversarial and polarizing public engagement activities that result in the pitting of experts against lay people Proponents of public deliberation claim that a more deliberative process can engage a diversity of participants in a more guided process that better balances expert knowledge and citizen inclusion Such an approach holds particular promise where citizens and governments engage in discussions of the most complex and intractable issues like climate change Given the host of challenges climate governance presents and the global consequences of our response to them the experience and knowledge shared by Hanson and the contributors to *Public Deliberation on Climate Change* provide an important framework for advancing public conversations and processes on this and other wicked problems The lessons contained in the volume were gained as a result of a five year multidisciplinary community university research project called Alberta Climate Dialogue ABCD which drew together scholars practitioners citizens civil society members and government officials from across Alberta at four public deliberations By highlighting the value tensions and trade offs and examining the impact that the design of the deliberations has on policy and the creation of conditions that encourage exchange the contributors aim to build capacity within our institutions and society to find new ways to discuss and solve complex problems

Public Relations Capitalism Anne M. Cronin, 2018-01-24 This book argues that we are witnessing the emergence of commercial democracy in which public relations promotional culture and the media play a new central role As the conventional democratic promise of political representation loses traction with the public in many countries commercial culture steps into this vacuum by offering mirror forms of democracy Commercial democracy promises representation voice and agency to the public and in doing so creates new forms of social contract Based on empirical material this book examines the Public Relations PR produced by corporations and communications produced by charities in an intensely mediatized society It presents a novel analysis of the shifting significance of brand and reputation It analyses the ascendancy of commercial speech PRs relationship to post truth politics and the transformation of cultural intermediaries into social brokers As PR and promotional culture come to inhabit the realm of the social contract and new forms of politics the public and the very idea of publicity are transformed

Do-it-yourself Democracy Caroline W. Lee, 2015 In *Do It Yourself Democracy* sociologist Caroline W Lee

examines how participatory innovations have reshaped American civic life over the past two decades Lee looks at the public engagement industry that emerged to serve government corporate and nonprofit clients seeking to gain a handle on the increasingly noisy demands of their constituents and stakeholders New technologies and deliberative practices have democratized the ways in which organizations operate but Lee argues that they have also been marketed and sold as tools to facilitate cost cutting profitability and other management goals and that public deliberation has burdened everyday people with new responsibilities without delivering on its promises of empowerment
