Chinas Road Ahead Problems Questions Perspectives Springerbriefs In Political Science:

China's Road Ahead Roland Benedikter, Verena Nowotny, 2013-11-22 This book provides a critical commentary on China's situation and future outlook from the perspective of the 2012-13 generational power transfer. In this power transfer taking place against the background of an increasingly unstable domestic situation, an apparently outstandingly successful generation of half-communist leaders recently increasingly plagued by scandal transferred responsibility to a generation confronted by mixed expectations and factional in-fighting. Many international observers doubt that the new leadership will have the will or the power to introduce serious reforms in a country that reports 100,000 riots involving more than 500 persons in public areas per year. The China of 2013 seems to be in the midst of a transition seldom seen since the 1970s. The question is if the resulting hope expressed by Chinese dissidents and Western leaders for a necessary development of China's still largely autocratic system towards a kind of context adequate democracy is plausible or not. Featuring incisive commentary by the authors and interviews with experts on the region's political economy, the volume addresses such timely questions as: Should rapid democratization of China be the strategic goal of the West or rather a step-by-step approach towards the rule of law first and illiberal democracy to follow? Should the West be more worried about a thriving China or a China in crisis? Will China's success contribute to the success of the global community and the world order system or be a threat to it? What can the West do to help China develop more participatory and inclusive approaches in order to secure social stability? And how can the West strengthen its democratic allies on China's borders? Endorsements: This is a book I recommend to students and teachers around the globe. It provides a concise introduction into present China's main problems, questions and perspectives. A must for all who try to understand the rising Pacific giant not through short-term answers but through long-term questions. Professor Ole Bruun, Institute for Society and Globalization, Roskilde University, Denmark. The rise of China to global superpower calls for clear, condensed yet comprehensive comments for the broader public. This book accomplishes those goals, providing a quick yet comprehensive introduction into what we may expect as the Middle Kingdom seeks to assert what it increasingly sees as its rightful role as a leading world power. Professor Richard Appelbaum, MacArthur Foundation Chair in Global International Studies and Sociology, University of California at Santa Barbara. The new constellation between China and the West needs inspiring departure points of discussion which may be sober or provocative. This booklet is both in one. It should be used as a basis for in-depth discussion and I recommend it for classrooms and the global civil society debate. Professor Jan Nederveen Pieterse, Mellichamp Professor of Global Studies and Sociology, University of California at Santa Barbara. [On Xi Jinping](#) Former Prime Minister Kevin Rudd, Kevin Rudd, 2024-10-15 In *On Xi Jinping* former Australian Prime Minister Kevin Rudd provides an authoritative account of the worldview driving Chinese behavior on the world stage. Focusing on domestic policy, political economy and foreign policy, Rudd argues that President Xi Jinping's worldview differs significantly from those of the leaders who preceded him and highlights how the shift has impacted policy. A

powerful analysis of the worldview of arguably the most consequential world leader of our era this will be essential reading for anyone interested in how Xi is transforming both China and the international order **The Clash of Entrepreneurial Cultures?** Harald Pechlaner, Hannes Thees, Wei Manske-Wang, 2022-06-09 This book uncovers the current knowledge on entrepreneurial cultures and the development of entrepreneurial ecosystems between Asia and Europe Broadening the scope spatially and conceptually the book discusses the entrepreneurial ecosystems as a system and mediator in their cultural political and socio economic settings in an interdisciplinary approach This allows a clearer perspective on stakeholders interaction international collaboration and competition power relations and political influence The various chapters in this edited volume cover the peculiarities and differences in Asia Europe and Eurasia with the New Silk Road or Belt and Road Initiative as the bridging component The chapters written for researchers and policy makers interested in Asian European cooperation also include discussions on economic systems globalization and regionalization politics cultures and digitalization

China and World Politics in Transition Fulvio Attinà, Yi Feng, 2023-05-26 This book analyzes China's transformative political power in today's world while simultaneously addressing global issues and the reformation of world institutions China has become known as the world's first factory and trading power but more knowledge on China's rise is necessary to understand the world of today and the future The main question is where China's rise is headed and how this affects the increasingly connected world that faces problems that no state can effectively address on its own This book analyzes both sides of the coin that is the problems of a world scale and the change of the world political order China is among the major actors for global issues such as mitigating climate warming controlling weapons of mass destruction combating economic inequality and underdevelopment and improving health for all In the current setting of the new world order all countries and especially world powers develop a general blueprint for the future as cultural and material conditions of the present world are very different from the past Under such conditions China faces a review of its bilateral and regional strategies as well as its position and actions in world institutions that have the mission of forming policy responses to issues of a global scale This book therefore provides insight into China's view of world problems and the future world order It is a must read for everybody interested in a better understanding of China's role in today's world and the global power shift

The China Question Dragan Pavličević, Nicole Talmacs, 2022-05-03 The China Question Contestations and Adaptations provides fresh perspectives on and empirics about China's international relations through the lens of the local and regional configurations and developments around the world While China's foreign policy strategies have received much attention and in particular the Belt and Road Initiative BRI the local contestations and or adaptations that China provokes in the countries and regions it engages remain under researched In this book a global collection of scholars examines how countries societies and individuals around the world are responding to China's rise **China's Challenges and International Order**

Transition Huiyun Feng, Kai He, 2020-01-30 China's Challenges and International Order Transition introduces an integrated

conceptual framework of international order categorized by three levels power rules and norms and three issue areas security political and economic Each contributor engages one or more of these analytical dimensions to examine two questions 1 Has China already challenged this dimension of international order 2 How will China challenge this dimension of international order in the future The contested views and perspectives in this volume suggest it is too simple to assume an inevitable conflict between China and the outside world With different strategies to challenge or reform the many dimensions of international order China s role is not a one way street It is an interactive process in which the world may change China as much as China may change the world The aim of the book is to broaden the debate beyond the Thucydides Trap perspective currently popular in the West Rather than offering a single argument this volume offers a platform for scholars especially Chinese scholars vs Western scholars to exchange and debate their different views and perspectives on China and the potential transition of international order

Challenges Facing Chinese Political Development Sujian Guo, Baogang Guo, 2007-01-01 Examining the challenges of Chinese political development from a holistic perspective each of the authors emphasizes a particular dimension of political culture political economy foreign policy and environmental and social challenges

Newland, 2015-06-11 In this edited volume a set of issue and country experts tackle questions regarding China s current rise to power within the current international economic and political order The current international system is governed by a Western conception of order and based on the primacy of post World War II rules drawn from liberal models of capitalism and democracy practiced in the US and in Western Europe In this context the most important and most uncertain questions facing the West over the next decade concern how the EU and the US will respond to China s rapid growth Will the transatlantic relationship hold and become stronger faced with this new economic and geopolitical challenge Or will the US and the EU an increasingly prominent global player compete for economic and political advantage After a brief introduction laying out the circumstances of China s economic and political rise and the challenges that this poses to the existing international order the book proceeds in three sections The first section provides competing theoretical perspectives on China s rise in a historical context The second section provides a distinctly Chinese perspective on China s current rise The third section looks at responses from the United States and the European Union focusing on both economic and security issues as well as the implications of China s rise for US EU relations This book is relevant to both scholars and policymakers concerned with Chinese domestic politics and foreign policy US foreign policy EU foreign policy China US relations China EU relations international security international political economy and emerging markets
