This textbook begins by introducing the concept of the time value of money and explaining how it is applied in valuation. It then uses practical and easy to understand examples to illustrate the application of the time value of money concept in valuing cash flows, annuities and perpetuities. This is followed by an in depth discussion of the firm's financing sources and the determination of its cost of capital. The remainder of the textbook discusses the valuation of fixed income securities, equity assets and the firm featuring specific examples and case studies from South Africa, Europe and the Americas. Equity asset and firm valuation approaches discussed include variants of single and multiple stage growth, dividend discount models, free cash flows, residual income and multiple valuation approaches. The practical examples and case studies equip students with the tools they need to apply these valuation approaches. Aimed at upper undergraduate and postgraduate accounting and finance students, this textbook discusses in which context each valuation approach is most appropriate. Developing Financial Leadership in Small-Medium Businesses Stewart Barnes, Malcolm Prowle, 2025-03-12 Many small medium enterprises (SMEs) are very small organisations comprising mainly single person and micro businesses but in the United Kingdom there are around 250 000 small medium businesses (SMBs) which are substantial businesses with turnovers of millions or tens of millions of pounds. A key requirement for thriving SMBs is effective leadership throughout the organisation. One crucial aspect which is often overlooked is that of financial leadership. Financial management in SMBs is often seen as a technique based activity whereby finance staff have a limited role preparing annual financial accounts and disseminating financial information to key individuals in the organisation. They may act reactively by responding to requests for specific financial information. On the other hand, strong financial leadership is proactive, constructive and innovative and plays a critical role in ensuring that organisations stay financially adaptable and can build resilience and sustainability in today's fierce market. The most effective financial leaders have a sophisticated and thorough understanding of their organisation's financial health and they make decisions grounded in financial realities to use that information in their communication to demonstrate the strategic connection between money, mission and purpose. This

research volume asserts that understanding the importance of utilising robust financial management approaches and financial information in making business decisions and assessing business performance is the key This is especially relevant for SMBs as they can have a significant influence on countries economies It will therefore be of interest to researchers academics practitioners and advanced students in the fields of leadership financial management entrepreneurship and strategy
