Cheaponomics The High Cost Of Low Prices:

Cheaponomics Michael Carolan, 2014-03-21 Do you really think you are getting a good deal when given that free mobile phone for switching service providers if a multinational retailer undercuts its competitors or by the fact that food is relatively cheaper today in many countries than ever before Think again As Michael Carolan clearly shows in this compelling book cheapness is an illusion The real cost of low prices is alarmingly high It is shown for example that citizens are frequently subsidising low prices through welfare support to poorly paid workers in their own country or relying on the exploitation of workers in poor countries for cheap goods Environmental pollution may not be costed into goods and services but is paid for indirectly by people living away from its source or by future generations Even with private cars when the total costs of this form of mobility are tallied it proves to be an astronomically expensive model of transportation All of these costs need to be accounted for The author captures these issues by the concept of cheaponomics The key point is that costs and risks are socialised we all pay for cheapness but not at the point of purchase Drawing on a wide range of examples and issues from over consumption and waste to over work unemployment inequality and the depersonalising of communities it is convincingly shown that cheapness can no longer be seen as such a bargain Instead we need to refocus for a better sense of well being social justice and a balanced approach to prosperity

The Fossil-Fuelled Climate Crisis Raymond Murphy, 2020-09-29 This book analyses the threat posed by the continued use of fossil fuels By utilizing Elizabeth Shove's social practices approach and Murphy's own social closure framework the book examines the accelerating treadmill of carbon polluting practices It incorporates externalities theory to investigate how the full cost of fossil fuels is paid by others rather than users and to demonstrate that the environmental

commons is a medium for conveying intergenerational monopolisation and exclusion in the Anthropocene Murphy uncovers a pattern of opposition to change when exploiting valuable but dangerous resources He argues that a new faith in mastering nature is emerging as a belief in just in time technological solutions to circumvent having to change fossil fuelled practices The book then moves on to assess proposed solutions including Beck's staging of risk and his hypothesis that the anticipation of global catastrophe will incite emancipation It proposes a novel approach to enhancing foresight and avoid incubating disaster It will appeal to readers interested in an original social science analysis of this creeping crisis and its resolution

The Real Cost of Cheap Food Michael Carolan, 2018-02-06 This thought provoking but accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and by exploring what exactly cheap food affords us Detailing the numerous ways that our understanding of food has narrowed such as its price per ounce combination of nutrients yield per acre or calories the book argues for a more contextual view of food when debating its affordability The first edition published in 2011 was widely praised for its innovative approach and readability In this new edition the author brings all data and citations fully up to date Increased coverage is given to many topics including climate change aquaculture financialization BRICS countries food based social movements gender and ethnic issues critical public health and land succession There is also greater discussion about successful cases of social change throughout all chapters by including new text boxes that emphasize these more positive messages The author shows why today's global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Many of these costs will be paid for in other ways or by future generations and cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to international development national security healthcare industrial meat production organic farming corporate responsibility government subsidies food aid and global commodity markets It is shown that exploding the myth of cheap food requires we have at our disposal a host of practices and policies

Seasonal Workers in Mediterranean Agriculture Jörg Gertel, Sarah Ruth Sippel, 2014-04-03 Over the last three decades there has been a rapid expansion of intensive production of fresh fruit and vegetables in the Mediterranean regions of south and west Europe Much of this depends on migrating workers for seasonal labour including from Eastern Europe North Africa and Latin America This book is the first to address global agro migration complexes across the region It is argued that both intensive agricultural production and related working conditions are highly dynamic Regional patterns have developed from small scale family farming to become an industrialized part of the global agri food system which increasingly depends on seasonal labour Simultaneously consumer demand for year round supply has caused relocations of the industry within Europe areas of intensive greenhouse production have moved further south and even into North Africa The authors investigate this Mediterranean agri food system that transcends borders and is largely constituted by invisible seasonal work By revealing the story of food commodities loaded with implications of private profit seeking

exploitation exclusion and multiple insecurities the book unmask the hidden costs of fresh food provisioning Three case study areas are considered in detail the French region of Provence a traditional centre of fresh fruit and vegetable cultivation the Spanish Almer a region where intensive production has accelerated dramatically since the 1970s and Morocco where counter seasonal production has recently been expanding The book also includes commentaries that refer to complementary insights on US Mexico Philippines Canada and South Pacific mobilities Food Utopias Paul V. Stock,Michael Carolan,Christopher Rosin,2015-01-09 Food is a contentious and emotive issue subject to critiques from multiple perspectives Alternative food movements including the different articulations of local food miles seasonality food justice food knowledge and food sovereignty consistently invoke themes around autonomy sufficiency cooperation mutual aid freedom and responsibility In this stimulating and provocative book the authors link these issues to utopias and intentional communities Using a food utopias framework presented in the introduction they examine food stories in three interrelated and complementary ways utopias as critique of existing systems utopias as engagement with experimentation of the novel the forgotten and the hopeful in the future of the food system and utopias as process that recognizes the time and difficulty inherent in changing the status quo The chapters address theoretical aspects of food utopias and also present case studies from a range of contexts and regions including Argentina Italy Switzerland and USA These focus on key issues in contemporary food studies including equity locality the sacred citizenship community and food sovereignty Food utopias offers ways forward to imagine a creative and convivial food system **The Sociology of Food and Agriculture** Michael Carolan,2016-02-12 In this second edition of The Sociology of Food and Agriculture students are provided with a substantially revised and updated introductory text to this emergent field The book begins with the recent development of agriculture under capitalism and neo liberal regimes and the transformation of farming and peasant agriculture from a small scale family run way of life to a globalized system Topics such as the global hunger and obesity challenges GM foods and international trade and subsidies are assessed as part of the world food economy The final section concentrates on themes of sustainability food security and food sovereignty The book concludes on a positive note examining alternative agri food movements aimed at changing foodscapes at levels from the local to the global With increased coverage of the financialization of food food and culture gender ethnicity and justice food security and food sovereignty the book is perfect for students with little or no background in sociology and is also suitable for more advanced courses as a comprehensive primer All chapters include learning objectives suggested discussion questions and recommendations for further reading to aid student learning 250 Years of Industrial Consumption and Transformation of Nature: Impacts on Global Ecosystems and Life Hubert Engelbrecht,2017-12-20 Anthropogenic changes in the environment caused by 250 years of economic growth and utilization of fuel and mineral resources have considerably impacted the natural environment The resulting physical and chemical alterations to the Earth s sphere and our adaptive responses in the biosphere are detailed in this reference book

Readers will learn about concepts relevant to Earth's history the evolution of life economy ecology environmental history biology and medicine and how these concepts can be linked to environmental change The scope of this interdisciplinary work entails to convey the true degree of responsibility for the universal consequences of ecosystem degradation resulting from industrial processing human consumption and the transformation of natural sites due to industrialization and urbanization Topics covered in the book include ecosystem transformations by natural and anthropogenic forces the Anthropocene epoch a short history of industrialization environmental sites and the impact of socio economic influences the current environmental crisis This textbook is intended for graduate students in economics civil engineering architecture agronomics forestry technical and mining sciences political sciences business studies and humanities General readers who wish to understand the basic philosophy behind environmental studies and their relation to human activity can also benefit from this book Global Meat Bill Winders, Elizabeth Ransom, 2019-10-29 The growth of the global meat industry and the implications for climate change food insecurity workers rights the treatment of animals and other issues Global meat production and consumption have risen sharply and steadily over the past five decades with per capita meat consumption almost doubling since 1960 The expanding global meat industry meanwhile driven by new trade policies and fueled by government subsidies is dominated by just a few corporate giants Industrial farming the intensive production of animals and fish has spread across the globe Millions of acres of land are now used for pastures feed crops and animal waste reservoirs Drawing on concrete examples the contributors to Global Meat explore the implications of the rise of a global meat industry for a range of social and environmental issues including climate change clean water supplies hunger workers rights and the treatment of animals Three themes emerge from their discussions the role of government and corporations in shaping the structure of the global meat industry the paradox of simultaneous rising meat production and greater food insecurity and the industry's contribution to social and environmental injustice Contributors address such specific topics as the dramatic increase in pork production and consumption in China land management by small scale cattle farmers in the Amazon the effect on the climate of rising greenhouse gas emissions from cattle raised for meat and the tensions between economic development and animal welfare Contributors Conner Bailey Robert M Chiles Celize Christy Riva C H Denny Carrie Freshour Philip H Howard Elizabeth Ransom Tom Rudel Mindi Schneider Nhung Tran Bill Winders **Society and the Environment** Michael Carolan, 2018-05-15 Society and the Environment examines today's environmental controversies within a socio organizational context After outlining the contours of pragmatic environmentalism Carolan considers the pressures that exist where ecology and society collide such as population growth and its associated increased demands for food and energy He also investigates how various ecological issues such as climate change are affecting our very own personal health Finally he drills into the social structural dynamics including political economy and the international legal system that create ongoing momentum for environmental ills This interdisciplinary text features a three part structure in each chapter that covers fast facts about the

issue at hand examines its wide ranging implications and offers balanced consideration of possible real world solutions New to this edition are Movement Matters boxes which showcase grassroots movements that have affected legislation Discussion questions and key terms enhance the text s usefulness making Society and the Environment the perfect learning tool for courses on environmental sociology
