Charlotte Perkins Gilman L Frank Baum Stephen Crane Charles Chesnutt Gertrude Stein Nella Larsen and William Carlos Williams Chromographia argues that modern aesthetic techniques are inseparable from the theories and technologies that drove modern color Nicholas Gaskill shows how literature registered the social worlds within which chromatic technologies emerged and also experimented with the ideas about perception language and the sensory environment that accompanied their proliferation Chromographia is the only study of modern color in U S literature It presents a new reading of perception in literature and a theory of experience that uses color to move beyond the usual divisions of modern thought
